EXPLANATORY NOTES

This Act amends the Mining Act in a number of ways.

Among other things, it adds a chapter containing provisions specific to Native communities.

Claim holders must notify the municipality and the landowner concerned within 60 days after registering a claim of the fact that they have obtained the claim, and must inform the municipality and the landowner at least 30 days before performing work. They must also submit an annual report on all work performed to the Minister of Natural Resources.

An obligation is introduced to declare the discovery of mineral substances containing 0.1% or more of triuranium octaoxyde within 90 days after the discovery.

A mining lease cannot be granted until a rehabilitation and restoration plan, regarding which the certificate of authorization required under the Environment Quality Act has been issued, and a scoping and market study as regards processing in Québec are submitted to the Minister.

In the case of a metal mine project where the mine has a production capacity of less than 2,000 metric tons per day, a public consultation must be held before a mining lease may be granted.

When granting a lease, the Government may, on reasonable grounds, require that the economic spinoffs within Québec of mining the mineral resources authorized under the lease be maximized and may require the lessee to establish and maintain a monitoring committee to foster the involvement of the local community in the project as a whole.

Mining rights holders must provide information to the Minister about the quantity of ore extracted and its value, the duties paid under the Mining Tax Act, and the overall contributions paid by them.

The information the Minister obtains from holders of mining rights for the purposes of the Mining Act is now public information. However, reports on exploration work involving amounts beyond the

allowances that may be claimed under the Mining Tax Act remain confidential for five years.

A public consultation must be held before a peat lease or a lease to carry on an industrial activity or to engage in commercial export may be issued. The Minister may refuse to grant or may terminate a sand and gravel lease, in the public interest.

The power of expropriation given to holders of mining rights may only be exercised during the actual mining stage, and the holders are required to provide financial support to owners during negotiations to acquire a residential immovable or an immovable used for agricultural purposes and situated on farm land and to obtain a written authorization at least 30 days in advance in order to access the site.

The system of penal sanctions under the Mining Act is updated and various technical amendments are made to that Act.

The Act respecting land use planning and development is amended to allow regional county municipalities to delimit any mining-incompatible territory in their land use and development plan. The sites and parcels of land included in such territories are specified in the Mining Act and mineral substances included in them are withdrawn from mining activities.

Lastly, the Regulation respecting environmental impact assessment and review is amended in order to make all mineral processing plant construction and operation projects and all mine development and operation projects, where the processing or production capacity of the plant or the mine is 2,000 metric tons or more per day, and all such projects relating to rare earth processing, subject to an environmental assessment, regardless of the processing or production capacity of the project.

- Act respecting land use planning and development (chapter A-19.1);
- Mining Act (chapter M-13.1).

REGULATION AMENDED BY THIS ACT:

- Regulation respecting environmental impact assessment and review (chapter Q-2, r. 23).
