#### Regulation respecting the procedure to be observed for immovable construction projects of health and social services agencies and public and private institutions under agreement

An Act respecting health services and social services (R.S.Q., c. S-4.2, ss. 485 and 486; 2006, c. 29, s. 44)

1. This Regulation applies to immovable construction projects of health and social services agencies and public and private institutions under agreement to which the Act respecting health services and social services (R.S.Q., c. S-4.2) applies, whether the agency or institution is involved either as the owner of the immovable responsible for awarding the work and entering into contracts for that purpose, or as the future lessee or occupant of the immovable responsible for all or part of the cost of such work carried out by the owner.

It does not apply to the carrying out of asset maintenance work as defined in section 263.1 of the Act.

- **2.** In this Regulation, "construction" means the erection, building, adaptation, reconstruction, repair or demolition of a structure, or any work involving the furnishing and installation of fixtures and requiring a specialized construction trade workforce.
- **3.** After consultation with the agency concerned, an institution must submit to the Minister every construction project requiring authorization under section 260 of the Act.

A construction project referred to in paragraph 3 of section 263 of the Act must be submitted to the agency concerned for authorization in accordance with that section.

Every construction project that an agency intends to undertake must be submitted to the Minister for approval.

The foregoing also applies to a construction project to be carried out by a third party owner if the agency or institution, as the future lessee or occupant of the immovable, is responsible for all or part of the cost of the work through rent or otherwise.

**4.** An agency or institution must obtain the written approval of the Minister before undertaking to finance or incur any expenditure for services related to a construction project or for professional services related to the concept and the preliminary plans and specifications of a construction project.

The agency or institution must also obtain the written approval of the Minister before the drawing up of the final plans and specifications.

In addition, before the issue of a call for tenders to award a contract for the carrying out of construction work, the agency or institution must obtain written confirmation from the Minister that the carrying out of the project has been authorized or approved under section 3.

5. The provisions of section 4 apply, with the necessary modifications, to the procedure to be observed for immovable construction projects referred to in the second paragraph of section 3. For that purpose, every reference to the Minister in section 4 is a reference to the agency concerned.

Despite the foregoing, an institution intending to enter into a mixed contract for construction work and professional services or a public-private partnership contract to carry out such a construction project must obtain the written approval of the Minister.

**6.** This Regulation comes into force on the fifteenth day following the date of its publication in the *Gazette officielle du Québec*.

#### **Draft Regulation**

An Act respecting the Régie de l'énergie (R.S.Q., c. R-6.01)

#### Maximum production capacity under a program to purchase electric power from small hydroelectric plants

Notice is hereby given, in accordance with sections 10 and 11 of the Regulations Act (R.S.Q., c. R-18.1), that the Regulation respecting the maximum production capacity under a program to purchase electric power from small hydroelectric plants, appearing below, may be made by the Government on the expiry of 45 days following this publication.

The draft Regulation determines the maximum production capacity of facilities producing electric power under a Hydro-Québec program, the conditions of which have been approved by the Régie de l'énergie, where such a program is to purchase electric power from small hydroelectric plants, controlled by a local, regional or Aboriginal community.

Through the Regulation, the Government seeks to facilitate the development of small hydro projects of 50 MW or less and to maximize the economic benefits as follows:

- 1. The purpose of the distributor's program to purchase electric power is to support the development of small hydro projects for the benefit of the regions of Québec.
- 2. A small hydro project is defined as a hydroelectric project of 50 MW or less whose water power is in whole or in part in the domain of the State; the interested municipalities or Aboriginal communities are free to develop water power if they see an interesting socio-economic development opportunity for their region.

A project is also covered by the program if the land or water power necessary for hydroelectric development is both in the domain of the State and in the private domain.

3. To ensure optimal development of those small hydro projects for the benefit of regions, the Government considers it appropriate that a program to purchase a first block of 150 MW from community projects and to establish a competitive price, adjusted annually, be implemented by Hydro-Québec.

The projects presented under the program must

- be controlled by a local, regional or Aboriginal community;
  - be a source of benefits for the region concerned;
- have been the subject of a consultation with the population concerned by the project;
  - have the support of the local or regional community.

Projects for which a letter of intent from the Ministère des Ressources naturelles et de la Faune for the granting of water power in the domain of the State has been granted before the beginning of the program will be prioritized.

The draft Regulation has no direct impact on the public. Promoters, made up of local, regional or Aboriginal communities interested in developing small hydro projects, will be able to participate in the distributor's program to purchase electric power.

Further information on the draft Regulation may be obtained by contacting René Paquette, Director General, Electricity, Ministère des Ressources naturelles et de la Faune, 5700, 4° Avenue Ouest, bureau A 416, Québec (Québec) G1H 6R1; telephone: 418 627-6386; fax: 418 646-1878; e-mail: rene.paquette@mrnf.gouv.qc.ca

Any person wishing to comment on the draft Regulation is requested to submit written comments within the 45-day period to Daniel Bienvenue, Associate Deputy Minister, Energy, Ministère des Ressources naturelles et de la Faune, 5700, 4° Avenue Ouest, bureau B 401, Québec (Québec) G1H 6R1.
