List of Medications

1 January 1997

Foreword

The List of Medications is prepared by the Minister of Health and Social Services and contains a listing of the drugs whose cost is covered by the basic prescription drug insurance plan. The list may also include certain supplies considered by the Minister to be essential for the administration of prescription drugs. For all drugs covered by the basic plan, the List of Medications indicates generic names, brand names, manufacturer's names, the conditions on which drugs may be obtained from manufacturers or wholesalers accredited by the Minister, and the manner of establishing the prices of drugs supplied as part of the services provided by an institution. Where drugs are supplied by pharmacists and coverage is provided by the Régie de l'assurance-maladie du Québec, the list also indicates the prices of drugs sold by manufacturers or wholesalers accredited by the Minister, the manner of establishing prices, and the maximum amount, where applicable, for which payment is covered by the basic plan, in the cases and on the conditions determined by the Minister.

Preparation of the List of Medications is governed by sections 60 and following of the *Act respecting prescription drug insurance and amending various legislative provisions* (1996, c. 32).

General information

1. ESTABLISHING THE PRICES INDICATED ON THE LIST OF MEDICATIONS

The drug prices indicated on the List of Medications are established according to the "guaranteed selling price" concept, in keeping with the manufacturer's commitment and in accordance with the manner of establishing prices provided for in section 60 of the *Act respecting prescription drug insurance and amending various legislative provisions*.

However, where a drug produced by a non-accredited manufacturer is considered unique and essential and appears on the List of Medications, no price is indicated and the price payable by the Régie de l'assurance-maladie du Québec is the pharmacist's cost price. Such drugs are identified on the list by the abbreviation UE.

1.1 Guaranteed selling price

The manufacturer's commitment stipulates that the manufacturer must submit a guaranteed selling price, per package size, for any drug it wishes to have included in the List of Medications. The number of package sizes is limited to two, and the price must reflect any price granted for multiples. For certain drugs, such as antibiotics in oral suspensions, ophthalmic solutions, and topical creams or ointments whose therapeutic use has been established for more than two package sizes, the manufacturer may submit a guaranteed selling price for each package size.

The guaranteed selling price submitted must not be higher than any selling price granted by the manufacturer for the same drug under other provincial drug insurance programs.

The guaranteed selling price may differ for sales to pharmacists and sales to wholesalers, in which case the difference between the price to pharmacists and the price to wholesalers, for each package size, must not exceed 9%.

Interim provisions applicable in January 1997.

On an interim basis, pharmacists and wholesalers will be aware of the names of the manufacturers who have submitted two guaranteed selling prices. All products from these manufacturers, which are listed in Appendix I, are paid for at the pharmacist's guaranteed selling price. The difference between the two guaranteed selling prices is the wholesaler's mark-up for these products.

2. ESTABLISHMENT OF THE PRICE PAYABLE

The price of a drug paid for by the Régie de l'assurance-maladie du Québec is the accredited drug manufacturer's or wholesaler's selling price, as established in the manner described in the List of Medications; in certain cases, this price is the maximum amount indicated on the List of Medications.

2.1 Actual purchase price

The method used to establish the price payable by the Régie is the ACTUAL PURCHASE PRICE method.

Under this method, the prices reimbursable to pharmacists by the Régie de l'assurance-maladie are the prices

indicated on the version of the list in force when the prescription is filled, taking into account the source of supply and the package size.

The List of Medications published by the Régie contains the prices submitted by the manufacturer in accordance with the guaranteed selling price concept, as stipulated in the manufacturer's commitment.

The price payable by the Régie for products included under the headings *Products for extemporaneous preparations* and *Vehicles, solvents or adjuvants*, where the manufacturer's name is not indicated, is the pharmacist's cost price.

2.2 Lowest price

For certain drugs (generic names) that have been on the List of Medications for 15 years or more and that are produced by two or more manufacturers, the lowest price method is used to establish the price payable. This method is based on the lowest guaranteed selling price submitted by a manufacturer for a package size of a given drug.

The generic names for which the lowest price method applies are identified on the list by the abbreviation P.P.B.

2.2.1 The lowest price method

The lowest price method is as follows:

— For a given drug (generic name, form, strength), all products for which the manufacturers submitted guaranteed selling prices are considered insured and, as a result, are included in the List of Medications.

— The lowest price is payable for the product of the manufacturer that submitted the lowest guaranteed selling price, as well as for the products of any manufacturers that agree to adjust their prices to the lowest price.

— The other products are reimbursable by the Régie de l'assurance-maladie du Québec at the guaranteed selling prices submitted by the manufacturers (even if these prices exceed the lowest prices) in cases where, for special reasons, the physician or dentist who issued the prescription wrote on it, in his handwriting, that no substitutions are allowed.

— Where a beneficiary refuses a substitution and insists on receiving the more expensive product prescribed, the pharmacist may charge the beneficiary the difference between the price of the product prescribed and the lowest price (the price reimbursed by the Régie).

2.2.2 Exception to the basic principle

The lowest price method does not apply to a drug (generic name) where, for therapeutic or other reasons, the drug is no longer considered desirable, even if it has been on the list for fifteen years or more and is produced by two or more manufacturers.

2.2.3 Requirements

An accredited manufacturer, in keeping with its commitment, must submit a guaranteed selling price, per package size, for each product it wishes to have included in the List of Medications. The number of package sizes is usually limited to two.

Under the lowest price method, a manufacturer may authorize its guaranteed selling price to be adjusted to the price of the lowest-priced product, either when the List of Medications is updated, when the manufacturer's prices are submitted, or after the list is published.

If the manufacturer authorizes the adjustment when it submits its prices, the price indicated on the list for that product will be the lowest price.

When a manufacturer authorizes its price to be adjusted to the lowest price, that price becomes its guaranteed selling price and remains subject to all the provisions of the *Regulation respecting the conditions on which manufacturers and wholesalers of medications shall be recognized*.

2.2.4 Grouping of pharmaceutical forms and strengths

For the purpose of applying the lowest price method, certain pharmaceutical forms or strengths in terms of active ingredients may be grouped together under the same generic name.

Thus, under a given generic name, slow-release products are grouped together with regular-release products. The price payable is then established on the basis of the price of the lowest-priced product, taking into account the corresponding dosages.

Pharmaceutical forms and strengths of certain drugs are not grouped together where, for therapeutic or other reasons, this is not considered desirable.

2.3 Maximum amount

The Minister may, where particular circumstances warrant, establish a maximum amount paid for a drug. In such a case, the price payable must not exceed the maximum amount indicated on the List of Medications.

2.4 Accredited drug wholesaler's mark-up

The drug wholesaler's mark-up on a drug is payable only if the drug was actually purchased through an accredited wholesaler. For certain expensive drugs, the mark-up may be limited to a maximum amount, according to the terms and conditions described below.

In establishing its selling prices, an accredited drug wholesaler must not add more than 9% to the manufacturer's guaranteed selling price for the package size purchased.

For the application of this provision, the wholesaler must, in keeping with its commitment, declare the percentage mark-up that it must add exclusively to the manufacturer's guaranteed selling price for all drugs appearing on the list during the period for which the list is valid.

Accredited drug wholesalers, approved distribution centres, and their mark-ups are listed in Appendix II.

2.4.1 Maximum mark-up

Under the regulatory provisions, the mark-up on certain expensive drugs may be limited to a maximum amount.

For these expensive drugs, the wholesaler's mark-up is limited to a maximum amount of \$20. The products to which this measure applies are those whose guaranteed selling price to wholesalers, for the smallest package size or its indivisible multiple, is \$280 or more.

Interim provisions applicable in January 1997.

On an interim basis and for technical considerations, the products to which this measure applies are those whose price is \$400 or more, and the prices indicated on the list for these products include the maximum \$20 mark-up. The products on which the wholesaler's mark-up is limited to \$20 are listed in Appendix III.

2.5. Conditions of supply

Only those products appearing on the list and purchased through an accredited drug manufacturer or wholesaler may be billed to the Régie by a pharmacist.

When obtaining drug supplies, pharmacists must apply sound management practices and make rational purchases based on the quantity of a drug dispensed over a period of at least 30 days.

2.6 Price payable for drugs supplied by institutions

Under section 37 of the *Pharmacy Act* (R.S.Q., c. P-10), an institution is authorized to supply drugs to persons other than persons who are admitted or are registered with it. In addition to the responsibilities entrusted to them under the *Regulation respecting the application of the Hospital Insurance Act*, institutions may, under the basic plan, bill for drugs appearing on the List of Medications, prepared by the Minister pursuant to section 60 of the *Act respecting prescription drug insurance and amending various legislative provisions*, where these drugs are supplied to beneficiaries of the basic plan.

In such a case, the price payable to the institution is the lesser of its actual purchase price and the price established in accordance with the method described in the list.

3. EXTEMPORANEOUS PREPARATIONS

3.1 Definition

An extemporaneous preparation is any drug that is prepared in a pharmacy from a prescription, as opposed to an officinal preparation, which is already prepared.

3.2 Extemporaneous preparations whose cost is covered by the basic plan

The cost of an extemporaneous preparation is covered by the basic plan if it is an extemporaneous mixture that is not equivalent to a drug already manufactured and that represents:

— A preparation intended for internal use and manufactured from an oral form of a drug already appearing on the List of Medications. This extemporaneous preparation must not contain any other active substance.

— A preparation intended for internal use and resulting from the mixture of two or more of the following products in the form of an oral suspension, oral solution or syrup: erythromycin, hydroxyzine, nystatin, tetracycline and trimacnolone in association, where required, with one or more of the following vehicles: simple syrup, distilled water or saline solution.

— A topical-use preparation composed of a mixture of a drug already appearing in Class 84:00 *Skin and mucous membranes* on the List of Medications, and one or more products for the following extemporaneous preparations: salicylic acid, sulfur and tar in association, where required, with one or more vehicles, solvents or adjuvants.

— A topical-use preparation composed of one or more of the following products: salicylic acid, sulfur, tar and hydrocortisone with a cream, ointment or lotion base, with the exception of a sole hydrocortisone base having a strength of less than 1%.

— An ophthalmic preparation containing amikacin, cefazolin, vancomycin, gentamicin or tobramycin in strengths of 3 mg/mL or more.

— A solution or oral suspension of methadone.

— A topical preparation of nitrogen mustard (mechlorethamine hydrochloride).

The products for extemporaneous preparations and for vehicles, solvents or adjuvants payable appear in a special section of the List of Medications.

3.3 Price payable

The method applicable for establishing the price payable by the Régie for products used for extemporaneous preparations and for vehicles, solvents, or adjuvants is the pharmacist's cost price, where the manufacturer's name does not appear on the List of Medications.

4. EXCEPTIONAL MEDICATIONS

4.1 Definition

The List of Medications contains the exceptional medications provided for in a government regulation. The cost of these medications is covered by the basic plan in the cases and on the conditions provided for in that regulation, especially as regards therapeutic indications.

4.2 Objectives

a) To ensure that the cost of a drug classified as an exceptional medication is covered by the basic plan only where the drug is used for the therapeutic indications recognized by the Conseil consultatif de pharmacologie.

b) To permit, on an exceptional basis, payment for a drug appearing on the list under the heading *Exceptional medications*, where the drug:

— is considered effective for limited indications, neither its effectiveness nor the cost per treatment warranting its regular and continuous use for other indications;

— is generally reserved for hospitalized patients, but could be required for particular medical reasons.

4.3 Classification of exceptional medications

Drugs corresponding to the definition of exceptional medications are classified on the List of Medications separately, under the heading *Exceptional medications*.

4.4 Authorization for payment and duration of authorization

Drugs classified as exceptional medications are included in the basic plan coverage where the following conditions are fulfilled:

1° in the case of persons whose coverage under the basic plan is provided by the Régie de l'assurance-maladie du Québec, a prior request for authorization, duly completed in accordance with the form prescribed to that effect in the Regulation respecting forms and statements of fees under the Health Insurance Act (R.R.Q., 1981, c. A-29, r. 2) was sent to the Régie;

2° in the case of persons whose coverage under the basic plan is provided by insurers transacting group insurance or by administrators of private-sector employee benefit plans, a prior request for authorization, if required under the applicable group insurance contract or employee benefit plan, was sent to the insurer or to the administrator of the employee benefit plan, according to the terms and conditions provided for in that contract or plan.

Notwithstanding the foregoing, these drugs are covered only for the duration authorized, as the case may be, by the Board, the insurer, or the administrator of the employee benefit plan concerned, if the medications are prescribed for the therapeutic indications stipulated for each of them.

4.5 Therapeutic indications recognized for payment purposes

The therapeutic indications for drugs classified as exceptional medications whose cost is covered by the basic plan are listed in Appendix IV.

5. SUPPLIES

The List of Medications may include certain supplies considered by the Minister to be essential for the administration of prescription drugs. The supplies whose cost is covered by the basic plan appear on the list under the heading *Supplies*.

APPENDIX I

MANUFACTURERS THAT SUBMITTED
DIFFERENT GUARANTEED SELLING PRICES
FOR WHOLESALERS AND PHARMACISTS

| Manufacturer | | Difference between the pharmacist's G.S.P. and the wholesaler's G.S.P. |
|---------------------|-----------------------------------|---|
| Albert | Albert Pharma Inc. | 5% |
| Altimed | Altimed Pharmaceutical Inc. | 5% |
| Apotex | Apotex Inc. | 5% |
| Atlas | Laboratoires Atlas Inc. | 7.83% |
| Endo | Produits Endo | 6% |
| Genpharm | Pharmaceuticals Inc. | 5% |
| Lee-Adams | Lee Adams | 5% |
| Metapharma | Metapharma | 9% |
| Novopharm | Novopharm Ltée | 5% |
| Nu-Pharm | Nu-Pharm Inc. | 5% |
| Pfizer | Pfizer Canada Inc. | 5% |
| Pharmscience | Pharmscience Inc. | 5% |
| Pro Doc | Laboratoires Pro Doc Ltée | 5% |
| Rho-pharm | Rho-Pharm Inc. | 5% |
| Rhodia. | Rhodiapharm Inc. | 5% |
| Riva | Laboratoire Riva Ltée | 5% |
| Sabex | Sabex Inc. | 6.5% |
| Schein | Schein Pharmaceutical Canada Inc. | 5% |
| Technilab | Technilab Inc. | 5% |
| Trianon | Laboratoires Trianon Inc. | 5% |

APPENDIX II

DRUG WHOLESALERS
ACCREDITED BY THE MINISTER
AND EACH ACCREDITED
WHOLESALE'S MARK-UP

DISTRIBUTION FAMILI-PRIX INC.

Head office: **Distribution Famili-Prix Inc.**
1065, rue de Lescarbot
Québec (Québec)

— Mark-up 7.15%

— Supply source code **A**

Distribution centre:
1065, rue de Lescarbot
Québec (Québec)

DRUG TRADING COMPANY LIMITED

Head office: **Drug Trading Company Limited**
1960 Eglinton Avenue East
Scarborough, Ontario

— Mark-up 5.5%

— Supply source code **B**

Distribution centre:
2370 Walkly Road
Ottawa, Ontario

KOHLERS DISTRIBUTING (1996) LTD.

Head office: **Kohl's Distributing (1996) LTD.**
408 Cumberland Avenue
Hamilton, Ontario

— Mark-up 5.6%

— Supply source code **C**

Distribution centre:
408 Cumberland Avenue
Hamilton, Ontario

LE GROUPE JEAN COUTU (PJC) INC.

Head office: **Le Groupe Jean Coutu (PJC) Inc.**
530, rue Bériault
Longueuil (Québec)

— Mark-up 5.0%

— Supply source code **D**

Distribution centre:
530, rue Bériault
Longueuil (Québec)

McMAHON ESSAIM INC.

Head office: **McMahon Essaim Inc.**
10301, rue Colbert
Ville D'Anjou (Québec)

— Mark-up 7.15%

— Supply source code **F**

Distribution centre:
10301, rue Colbert
Ville D'Anjou (Québec)

**MÉDIS SERVICES
PHARMACEUTIQUES
ET DE SANTÉ INC.**

Head office: **Médis Services pharmaceutiques
et de santé Inc.**

3501, boul. Saint-Charles
Suite 101
Kirkland (Québec)

— Mark-up 6.5%

— Supply source code **G**

APPENDIX III

PRODUCTS FOR WHICH
THE WHOLERSALER'S MARK-UP IS LIMITED TO
A MAXIMUM AMOUNT

| Manufacturer | Brand name | Packaging |
|--------------|---|--------------|
| Berlex | Betaseron Pd. Inj. 9.6 M IU | 15 x 3 mL |
| Roche | Cytovene Perf. Pd. i.v. 500 mg | 25 vials |
| M.S.D. | Crixivan Caps. 200 mg | 360 capsules |
| M.S.D. | Crixivan Caps. 400 mg | 180 capsules |
| Knoll | Dilaudid-HP-Plus Inj. Sol. 20 mg/mL (50 mL) | 2 vials |
| Knoll | Dilaudid-XP Inj. Sol. 50 mg/mL (50 mL) | 2 vials |
| Ortho Bio. | Eprex Inj. Sol. 4000 IU/mL | 10 x 1 mL |
| Ortho Bio. | Eprex Inj. Sol. 10 000 IU/mL | 10 x 1 mL |
| Ortho Bio. | Eprex Inj. Sol. 20 000 IU/mL | 4 x 1 mL |
| Ortho Bio. | Eprex Inj. Sol. 20 000 IU/mL | 10 x 1 mL |
| Mc Gaw | Hepatic-Aid II 127 g/pouch | 24 pouchs |
| Lilly | Humatrope Pd. Inj. 5 mg | 6 vials |
| Sabex | Hydromorphone HP Inj. Sol. 50 mg/mL (50 mL) | 1 vial |
| Roche | Invirase Caps. 200 mg | 270 capsules |
| G.W. | Mepron Co. 250 mg | 200 tablets |
| G.W. | Mepron Oral Suspension 150 mg/mL | 210 mL |
| Amgen | Neupogen Inj. Sol. 300 mcg/mL (1.0 mL) | 10 vials |
| Amgen | Neupogen Inj. Sol. 300 mcg/mL (1.6 mL) | 10 vials |
| Bayer | Nimotop Caps. 30 mg | 100 capsules |
| W.A.C. | Norplant kit 36 mg | 1 kit |
| Roche | Nutropin Pd. Inj. 5 mg | 2 vials |
| Roche | Nutropin Pd. Inj. 10 mg | 2 vials |
| Fujisawa | Prograf Caps. 5 mg | 100 capsules |
| Roche | Pulmozyme nebulizer 1 mg/mL (2.5 mL) | 14 x 2.5 m |
| Roche | Pulmozyme nebulizer 1 mg/mL (2.5 mL) | 30 x 2.5 ml |
| Roche | Rocephin Inj. Pd. 2 g | 10 vials |
| Bristol | Vepesid Caps. 50 mg | 20 capsules |
| Roche | Vesanoid Caps. 10 mg | 100 capsules |
| G.W. | Zovirax Perf. Sol. i.v. 50 mg/mL (20 mL) | 5 vials |
| Zeneca | Zoladex-LA Implant 10.8 mg | 1 implant |

Interim provisions applicable as of January 1, 1997.

For the products on this list, the wholesaler's mark-up is limited to \$20 and is already included in the guaranteed selling price published in the List of Medications. Thus, for these products, the price payable is limited to the price indicated on the List of Medications.

APPENDIX IV

EXCEPTIONAL MEDICATIONS WITH RECOGNIZED INDICATIONS FOR PAYMENT PURPOSES

- (1) ACYCLOVIR, tab., Avirax, Zovirax:
 - (a) in immunodeficient patients, for the curative and preventive treatment of severe herpes virus infections;
 - (b) in immunocompetent patients:
 - i. for the early treatment of zona, that is, within 48 to 72 hours following the appearance of lesions;
 - ii. for the suppressive treatment of recurring herpes virus infections, that is, 6 episodes or more per year;
 - iii. for the curative treatment of severe herpes virus infections;
 - iv. for the early curative treatment of varicella-zoster infection in patients 13 years of age or older and in children over 12 months suffering from chronic skin diseases or pulmonary disorders or receiving a long-term salicylate-based therapy;
- (2) ACYCLOVIR, top. cr., top. oint.: for the local treatment of herpes virus infections in immunodeficient patients;
- (3) ALENDRONATE, tab., Fosamax:
 - (a) for the treatment of fractural postmenopausal osteoporosis;
 - (b) for the treatment of patients suffering from symptomatic Paget's disease who have an intolerance to or who do not respond to etidronate;
- (4) CALCIUM ALGINATE (fibre) dres., Kaltostat: for the treatment of patients suffering from serious burns or cutaneous ulcers;
- (5) ALUMINUM (hydroxide), tab, Amphojel: as a phosphate binder in patients suffering from severe renal failure;
- (6) ANASTROZOLE, tab., Arimidex: for the treatment of metastatic breast cancer in menopausal woman, after failure of a tamoxifen treatment or when a megestrol acetate treatment causes undesired weight gain;
- (7) ANETHOLE TRITHIONE, tab., Sialor: for the treatment of patients suffering from severe xerostomia;
- (8) BISACODYL, ent. tab., supp., Bisacolax, Bisacodyl, PMS-Bisacodyl, Apo-Bisocodyl: for the treatment of constipation secondary to opiate analgesics;
- (9) BUTORPHANOL (tartrate), nas. sol., Stadol NS: for the nonprophylactic treatment of episodes of migraines in patients for whom treatment with other analgesics or with other drug therapies is ineffective;
- (10) CALCIUM (acetate) tab., calcium acetate: as a phosphate binder in patients suffering from severe renal failure;
- (11) CALCIUM (carbonate and others), oral forms, Apo-Cal, Cal-500: as a calcium supplement for patients suffering from hypoparathyroidism, lactase deficiency, malabsorption, or severe chronic renal failure;
- (12) CALCIUM (gluconate)/CALCIUM (glucoheptonate), oral sol., Calcium Stanley, Calcium-Rougier: as a calcium supplement for children suffering from bovine protein or lactose intolerance;
- (13) CAPSAICIN, top. cr., Capsaicin cream, Capcsaicin mild, Capsaicin regular, Capsaisin Forte, Capsaicin-HP cream: for the treatment of pain caused by episodes of herpes zoster infection or related to peripheral neuropathies;
- (14) SODIUM CHLORIDE, dres., Mesalt: for the treatment of patients suffering from serious burns or cutaneous ulcers;
- (15) SODIUM CITRATE/SODIUM LAURYL SULFOACETATE, rect. sol., Microlax: for the treatment of constipation secondary to opiate analgesics;
- (16) CLINDAMYCIN (phosphate), top. sol., Dalacin-T: for the treatment of acne pustulosa in patients for whom topical erythromycin is ineffective or poorly tolerated;
- (17) CLOZAPINE, tab., Clozaril: for the symptomatic treatment of schizophrenia in patients for whom an appropriate treatment with antipsychotic drugs has proven ineffective or has caused intolerable side effects, preventing administration of an effective dose;
- (18) CYCLOSPORINE, caps, oral sol., Sandimmune, Sandimmune Neoral:
 - (a) for the prevention of the rejection of a graft subsequent to an organ transplant and for the treatment of rejection in patients having already received other immunosuppressants;

(b) for the prevention of the rejection of a graft subsequent to a bone marrow transplant and for the prevention or treatment of the graft-vs-host reaction (GVHR);

(c) for the treatment of persons suffering from severe psoriasis and for whom conventional therapies have proven ineffective or inadequate or where the severity of the disease justifies the risks of treatment with cyclosporine;

(d) for the treatment of persons suffering from severe progressive rheumatoid arthritis where slow-acting antirheumatismal agents have been inadequate or ineffective;

(e) for the treatment of persons who have a nephrotic syndrome, are steroid-dependent or are resistant to steroids, attributable to a glomerulopathy;

(19) DESMOPRESSIN (acetate), tab., DDAVP: for the treatment of patients suffering from diabetes insipidus who are unable to use a nasal vaporizer or a desmopressin nasal solution;

(20) DICLOFENAC SODIUM, oph. sol., Voltaren Ophtha: for the treatment of eye inflammation in patients for whom ophthalmic corticosteroids are not indicated;

(21) DIPYRIDAMOLE, tab., Apo-Dipyridamole-FC, APO-Dipyridamole-SC, Novo-Dipiradol, Dipyridamole, Persantine: for the prevention of thromboembolisms in patients who have valvular or vascular prostheses or who have undergone a bypass operation with a vein graft;

(22) DOCUSATE CALCIUM, caps., PMS-Docusate-Calcium, Docusate Calcium, Novo-Docusate Calcium: for the treatment of constipation secondary to opiate analgesics;

(23) DOCUSATE SODIUM, caps., syr., oral sol., Colax-S, Regulex, Selax, Novo-Docusate, Docusate Sodium, PMS-Docusate Sodium, PMS-Docusate, Soflax: for the treatment of constipation secondary to opiate analgesics;

(24) ALFA DORNASE, nebulizer, Pulmozyme: for the treatment of patients over 5 years of age suffering from cystic fibrosis and whose forced vital capacity is more than 40 percent of the predicted value;

(25) DORZOLAMIDE (hydrochloride), oph. sol., Trusopt:

(a) for the adjuvant treatment of glaucoma where treatment with a beta-blocker provides insufficient control of ocular tension;

(b) for the treatment of glaucoma using monotherapy when there is a contraindication for or intolerance to a beta-blocker;

(26) ALFA EPOETINE, inj. sol., Eprex:

(a) in dialysis patients or before the beginning of dialysis for the treatment of symptomatic anemia related to severe chronic renal failure;

(b) for the treatment of nonhemolytic symptomatic anemia in cancer patients or in patients treated with zidovudine after the dosage of this medication has been reassessed in the context of anemia and having no iron, folic acid or vitamin B12 deficiency.

(27) ESTRADIOL-17 β , skin patch, Estraderm 25, Estraderm 50, Estraderm 100, Vivelle 37.5, Vivelle 50, Vivelle 75, Vivelle 100: for patients unable to take estrogens orally because of thromboembolic disorders or who have an intolerance to oral estrogens;

(28) ESTRADIOL-17 β /NORETHINDRONE (acetate), skin patch, Estracomb: for patients unable to take estrogens orally because of thromboembolic disorders or who have an intolerance to oral estrogens;

(29) FAMCICLOVIR, tab., Famvir: for the early treatment of zona, that is, within 48 to 72 after the appearance of lesions;

(30) FENTANYL, skin patch, Duragesic: for relief of pain in patients intolerant to oral morphine preparations or unable to swallow because of a digestive pathology, and who do not have a painful unstable syndrome or too rapid a progression of symptoms in the advanced stage of a cancer;

(31) FILGRASTIM, inj. sol., Neupogen:

(a) during chemotherapy treatment of children suffering from a solid tumor;

(b) for the treatment of patients suffering from:

i. severe neutropenia (number of neutrophils under $0.5 \times 10^9/L$) occurring in the first cycles of chemotherapy;

ii. neutropenia liable to cause a delay in the administration of chemotherapy or an unacceptable dosage reduction;

iii. severe bone marrow suppression while awaiting a curative treatment by means of a bone marrow transplant or antithymocyte serum, and who develop a severe infection;

iv. congenital or hereditary neutropenia with a neutrophil count of less than $0.5 \times 10^9/L$, and who develop severe recurrent infections;

(c) for the treatment of HIV-infected patients suffering from neutropenia secondary to antiretroviral medication or ganciclovir who are unable to tolerate foscarnet and whose number of neutrophils remain under $0.5 \times 10^9/L$, despite temporary stopping of medication or dosage reduction;

(32) FLUCONAZOLE, oral susp., Diflucan:

(a) for the treatment of oropharyngeal candidiasis in patients for whom conventional therapy is ineffective or poorly tolerated;

(b) for the treatment of esophageal candidiasis;

(33) NUTRITIVE FORMULAS – CASEIN-BASED (INFANTS AND CHILDREN) Alimentum, Nutramigen, Pregestimil: food preparation for infants and children:

(a) allergic to complete milk proteins;

(b) requiring a lactose-free diet for galactosemia;

(c) suffering from persistent diarrhea or other severe gastrointestinal disorders;

(34) NUTRITIVE FORMULAS – POLYMERIZED GLUCOSE, Polycose:

(a) for total oral feeding and enteral feeding of patients requiring liquid nutritive formulas as their sole source of nutrition in presence of:

i. esophageal dysfunction or dysphagia;

ii. digestive or malabsorption disorders;

(b) for children suffering from Crohn's disease;

(c) for patients suffering from cystic fibrosis;

(35) NUTRITIVE FORMULAS – FRACTIONATED COCONUT OIL, MCT: for the nutritional management of persons who do not effectively digest or absorb long-chain fatty foods;

(36) NUTRITIVE FORMULAS – SKIM MILK/COCONUT OIL, Portagen: for the nutritional management of persons who do not effectively digest or assimilate long-chain fatty foods;

(37) NUTRITIVE FORMULAS – MONOMERIC, Citrisource, Criticare HN, Hepatic-Acid II, Peptamen, Peptamen Jr, Sandosource Peptide, Tolerex, Vital HN, Vivonex Pediatric, Vivonex Plus, Vivonex T.E.N.:

(a) for total oral feeding and enteral feeding of patients requiring liquid nutritive formulas as their sole source of nutrition in presence of:

i. esophageal dysfunction or dysphagia;

ii. maldigestion or malabsorption disorders;

(b) for children suffering from Crohn's disease;

(c) for patients suffering from cystic fibrosis;

(38) NUTRITIVE FORMULAS – POLYMERIC WITH RESIDUES, Advera, Compleat Modified, Glucerna, Isocal with fibre, Jevity, Nubasic fibres, Nutren with fibre, Nutrisource, Nutrisource HN, Pediasure with fibre:

(a) for total oral feeding and enteral feeding of patients requiring liquid nutritive formulas as their sole source of nutrition in presence of:

i. esophageal dysfunction or dysphagia;

ii. maldigestion or malabsorption disorders;

(b) for children suffering from Crohn's disease;

(c) for patients suffering from cystic fibrosis;

(39) NUTRITIVE FORMULAS – LOW-RESIDUE POLYMERIC, Ensure Hyper-Protéine, Isocal, Isocal HN, Isosource, Isosource HN, Isosource VHN, Isotein HN, Lipisorb, Méritene, NuBasics, NuBasics Plus, NuBasics VHP, Nutren 1, Nutren 1.5, Nutren 2, Osmolite HN, Pediasure, Promote, Pulmocare, Resource, Resource Plus, Resource for children:

(a) for total oral feeding and enteral feeding of patients requiring liquid nutritive formulas as their sole source of nutrition in presence of:

- i. esophageal dysfunction or dysphagia;
- ii. maldigestion or malabsorption disorders;

(b) for children suffering from Crohn's disease;

(c) for patients suffering from cystic fibrosis;

(40) NUTRITIVE FORMULAS – PROTEINS/CARBOHYDRATES & LIPIDS (INFANTS AND CHILDREN), Similac PM 60/40: food preparation for premature babies and infants requiring products low in mineral content;

(41) GANCICLOVIR, caps., Cytovene: for the maintenance treatment of cytomegalovirus (CMV) retinitis in immunodeficient patients;

(42) GRANISETRON (hydrochloride), tab., Kytril: as an antiemetic:

(a) on the first day of a highly emetic chemotherapy or radiotherapy treatment;

(b) in children during a highly emetic chemotherapy or radiotherapy treatment;

(c) during chemotherapy or radiotherapy in patients for whom conventional therapy is ineffective or poorly tolerated;

(43) MINERAL OIL, oral gel, Liq. Liq. (rect.), Lansoyl without sugar, Mineral oil, Fleet enema: for the treatment of constipation secondary to opiate analgesics;

(44) HYDROXYPROPYL METHYCELLULOSE, oph. sol., Eyelube, Isopto Tears: for the treatment of keratoconjunctivitis sicca;

(45) HYDROXYPROPYL METHYCELLULOSE/DEXTRAN 70, oph. sol., Tears Naturelle, Tears Naturelle II: for the treatment of keratoconjunctivitis sicca;

(46) IDARUBICIN (hydrochloride), caps., Idamycin: for the treatment of acute myelocytic leukemia in adults;

(47) BETA INTERFERON, 1-B, inj. pd., Betaseron: for the treatment of patients suffering from cyclic remitting multiple sclerosis who are capable of walking, although with assistance, and who have had 2 or more episodes of the disease within the last 2 years;

(48) KETOROLAC (tromethamine), oph. sol., Acular: for the treatment of eye inflammation in patients for whom ophthalmic corticosteroids are not indicated;

(49) LACTULOSE, syr., Cephulac, Chronulac, Comalose-R, Lactulax, PMS-Lactulose:

(a) for the treatment of hepatic encephalopathy;

(b) for the treatment of constipation secondary to opiate analgesics;

(50) MAGNESIUM (hydroxide), oral susp., Milk of magnesia: for the treatment of constipation secondary to opiate analgesics;

(51) MEGESTROL (acetate) tab., Apo-megestrol, Linmegestrol, Megace, Nu-Megestrol:

(a) for the treatment of cancer;

(b) for hormone replacement therapy in patients having suffered from breast cancer;

(52) METRONIDAZOLE, vag. gel., Nidagel: for the treatment of bacterial vaginosis in pregnant women;

(53) MIDODRINE (hydrochloride), tab., Amatine:

(a) for the treatment of primary idiopathic orthostatic hypotension in patients for whom the conventional treatment is insufficient or is contraindicated;

(b) for the treatment of secondary idiopathic orthostatic hypotension in patients suffering from Parkinson's disease;

(54) MINOCYCLINE (hydrochloride), caps, Apo-Minocycline, Minocin, Minocycline-100, Syn-Minocycline: for the treatment of acne or other superficial skin infections in patients for whom tetracycline would be indicated but is ineffective or poorly tolerated;

(55) OCTREOTIDE, s.c. inj. sol., Sandostatin:

(a) for the control of symptoms in patients suffering from carcinoid metastases and intestinal tumors secreting vasoactive peptides;

(b) for the treatment of acromegaly;

(56) ONDANSETRON (hydrochloride), tab., Zofran: as an antiemetic;

(a) on the first day of a highly emetic chemotherapy or radiotherapy treatment;

(b) in children during a highly emetic chemotherapy or radiotherapy treatment;

(c) during chemotherapy or radiotherapy in patients for whom conventional therapy is ineffective or poorly tolerated;

(57) CARBOXYMETHYL CELLULOSE, dressing, Aquacel, Aquacel Hydrofiber: for the treatment of patients suffering from serious burns or cutaneous ulcers;

(58) ACTIVATED CHARCOAL/SILVER DRESSING, dres., Actosorb Plus: for the treatment of patients suffering from serious burns or cutaneous ulcers;

(59) COLLAGEN/ALGINATE DRESSING, dres., Fibracol.; for the treatment of patients suffering from serious burns or cutaneous ulcers;

(60) HYDROCOLLOIDAL DRESSING, dres., Combiderm ACD, DuoDERM CGF Extra-Mince, DorDERM CGF Bordé, Tegasorb, Cutinova Hydro, DuoDERM, DuoDERM CGF, Tielle: for the treatment of patients suffering from serious burns or cutaneous ulcers;

(61) HYDROCOLLOIDAL/ALGINATE DRESSING, dres., DermaSorb: for the treatment of patients suffering from serious burns or cutaneous ulcers;

(62) HYDROGEL DRESSING, dres., NU-GEL: for the treatment of patients suffering from serious burns or cutaneous ulcers;

(63) SEMIPERMEABLE DRESSINGS, dres., Alldress: for the treatment of patients suffering from serious burns or cutaneous ulcers;

(64) PARAFFIN/MINERAL OIL, oph. oint., Peralube, Duratears: for the treatment of keratoconjunctivitis sicca;

(65) PENTOXIFYLLINE, tab. L.A., Trental: for the treatment of patients suffering from a trophic ulcer;

(66) MONOBASIC SODIUM PHOSPHATE/DIBASIC SODIUM PHOSPHATE, rect. sol., ped. rect. sol., Fleet, Enemol, Fleet Pediatric: for the treatment of constipation secondary to opiate analgesics;

(67) HYDROPHILIC POLYURETHANE, dres., Allewyn, Allewyn adhesive, Allewyn circular, Hydrasorb: for the treatment of patients suffering from serious burns or cutaneous ulcers;

(68) POLYVINYL (alcohol), oph. sol., PMS-Artificial Tears, R.O. Yeux secs: for the treatment of keratoconjunctivitis sicca;

(69) POLYVINYL(alcohol)/POLYETHYLENE GLYCOL 6000, oph. sol, Hypotears: for the treatment of keratoconjunctivitis sicca;

(70) POLYVINYL(alcohol)/POVIDONE, oph. sol., Tear Drops, PMS-Artificial: for the treatment of keratoconjunctivitis sicca;

(71) SENNOSIDES A&B, tab., gran., supp., Sennosides, PMS-Sennosides, Riva-Sennosides, Sennatabs, Senokot: for the treatment of constipation secondary to opiate analgesics;

(72) SOMATOTROPHIN, inj. pd., Humatrop, Nutropin, Saizen:

(a) for the treatment of children suffering from delayed growth caused by insufficient secretion of the endogenous growth hormone, except children who are carriers of a Turner's syndrome or are suffering from achondroplasia or from delayed growth of a genetic or familial type, children whose bone age has reached 15 years for girls and 16 years for boys, and children whose growth rate falls below 4 cm per year, evaluated on two consecutive visits at a 3-month interval, where they meet the following criteria:

i. untermiated growth and growth rate for their bone age less than the 25th percentile, calculated over at least a one-year period, except in the case of young children suffering from hyperglycemia secondary to a growth hormone deficiency, to whom the one-year observation period does not apply;

ii. serum concentration of somatotrophin less than 8 ng/mL measured by two pharmacological tests, or serum concentration between 8 and 10 ng/mL if the tests are repeated twice at a 6-month interval;

(b) for the treatment of children suffering from delayed growth related to chronic renal failure until renal transplant;

(73) SORBITOL, oral pd., Sorbital Rougier: for the treatment of constipation secondary to opiate analgesics;

(74) SUMATRIPTAN (succinate) tab., s.c. inj. sol., Imitrex: for the treatment of nonprophylactic episodes of migraines in patients for whom treatment with analgesics or with other drug therapies is ineffective;

(75) TOCOPHERYL (d-alpha acetate), caps., oral sol., Aquasol E: for the treatment of neurological manifestations associated with the malabsorption of vitamin E;

(76) TRETINOIN, top. cr., top. gel and top. sol., Vitamin A Acid Crème, Stieva-A, Retin-A, Vitinoin, Stieva-A Forte, Vitamin A Acid Gel Doux, Vitamin-A Acid Gel: for the treatment of acne;

(77) VALACYCLOVIR (hydrochloride) tab., Valtrex: for the early treatment of zona, that is, within 48 to 72 hours after the appearance of lesions.
