# List of Medications

## 1 July 1997

---

### Foreword

The List of Medications is prepared by the Minister of Health and Social Services and contains a listing of the drugs whose cost is covered by the basic prescription drug insurance plan. The list may also include certain supplies considered by the Minister to be essential for the administration of prescription drugs. For all drugs covered by the basic plan, the List of Medications indicates generic names, brand names, manufacturer's names, the conditions on which drugs may be obtained from manufacturers or wholesalers accredited by the Minister, and the manner of establishing the prices of drugs supplied as part of the services provided by an institution. Where drugs are supplied by pharmacists and coverage is provided by the Régie de l'assurance-maladie du Québec, the list also indicates the prices of drugs sold by manufacturers or wholesalers accredited by the Minister, the manner of establishing prices, and the maximum amount, where applicable, for which payment is covered by the basic plan, in the cases and on the conditions determined by the Minister.

Preparation of the List of Medications is governed by sections 60 and following of the *Act respecting prescription drug insurance and amending various legislative provisions* (1996, c. 32).

### General information

---

#### 1. ESTABLISHING THE PRICES INDICATED ON THE LIST OF MEDICATIONS

The drug prices indicated on the List of Medications are established according to the "guaranteed selling price" concept, in keeping with the manufacturer's commitment and in accordance with the manner of establishing prices provided for in section 60 of the *Act respecting prescription drug insurance and amending various legislative provisions*.

However, where a drug produced by a non-accredited manufacturer is considered unique and essential and appears on the List of Medications, no price is indicated and the price payable by the Régie de l'assurance-maladie du Québec is the pharmacist's cost price. Such drugs are identified on the list by the abbreviation UE.

#### 1.1 Guaranteed selling price

The manufacturer's commitment stipulates that the manufacturer must submit a guaranteed selling price, per package size, for any drug it wishes to have included in the List of Medications. The number of package sizes is limited to two, and the price must reflect any price granted for multiples. For certain drugs, such as antibiotics in oral suspensions, ophthalmic solutions, and topical creams or ointments whose therapeutic use has been established for more than two package sizes, the manufacturer may submit a guaranteed selling price for each package size.

The guaranteed selling price submitted must not be higher than any selling price granted by the manufacturer for the same drug under other provincial drug insurance programs.

The guaranteed selling price may differ for sales to pharmacists and sales to wholesalers, in which case the difference between the price to pharmacists and the price to wholesalers, for each package size, must not exceed 9 %.

#### Provisions concerning the application of two guaranteed selling prices

A manufacturer may, for all or some of its products, submit different guaranteed selling prices for sales to wholesalers and sales to pharmacists. The percentage difference between the two prices must not exceed 9 %, and may differ for each of the products concerned. For a given product, the difference is the same for all package sizes.

A manufacturer's guaranteed selling price to wholesalers must be the same for all wholesalers.

If the difference between the guaranteed selling prices to wholesalers and to pharmacists is equal to or greater than 5 %, this difference constitutes the wholesaler's mark-up. The price payable is then equal to the guaranteed selling price to pharmacists, except in the case of expensive products, for which the mark-up is limited to \$20.

If the difference between the guaranteed selling prices to wholesalers and to pharmacists is less than 5 %, the price payable is the guaranteed selling price to wholesalers plus the wholesaler's mark-up, except in the case of expensive products, for which the mark-up is limited to \$20 per package size.

The guaranteed selling price to pharmacists is the price that appears on the List of Medications and that is used, where applicable, in establishing the lowest price.

Manufacturers continue to be required to provide the Conseil consultatif de pharmacologie with guaranteed selling prices for wholesalers, from which the distribution allowances or discounts granted under other provincial drug programs are subtracted.

The names of manufacturers that submitted different guaranteed selling prices for pharmacists and wholesalers are listed in Appendix I.

## 2. ESTABLISHMENT OF THE PRICE PAYABLE

The price of a drug paid for by the Régie de l'assurance-maladie du Québec is the accredited drug manufacturer's or wholesaler's selling price, as established in the manner described in the List of Medications; in certain cases, this price is the maximum amount indicated on the List of Medications.

### 2.1 Actual purchase price

The method used to establish the price payable by the Régie is the ACTUAL PURCHASE PRICE method.

Under this method, the prices reimbursable to pharmacists by the Régie de l'assurance-maladie are the prices indicated on the version of the list in force when the prescription is filled, taking into account the source of supply and the package size.

The List of Medications published by the Régie contains the prices submitted by the manufacturer in accordance with the guaranteed selling price concept, as stipulated in the manufacturer's commitment.

The pharmacist's cost price is the price payable by the Régie where the manufacturer's name does not appear on the list. This is true, for example, of products listed under the headings *Products for extemporaneous preparations*, *Vehicles*, *solvents or adjuvants* and *Supplies*.

### 2.2 Lowest price

For certain drugs (generic names) that have been on the List of Medications for 15 years or more and that are produced by two or more manufacturers, the lowest price method is used to establish the price payable. This method is based on the lowest guaranteed selling price to pharmacists submitted by a manufacturer for a package size of a given drug.

The generic names for which the lowest price method applies are identified on the list by the abbreviation P.P.B.

### 2.2.1 The lowest price method

The lowest price method is as follows:

— For a given drug (generic name, form, strength), all products for which the manufacturers submitted guaranteed selling prices are considered insured and, as a result, are included in the List of Medications.

— The lowest price is payable for the product of the manufacturer that submitted the lowest guaranteed selling price, as well as for the products of any manufacturers that agree to adjust their prices to the lowest price.

— The other products are reimbursable by the Régie de l'assurance-maladie du Québec at the guaranteed selling prices submitted by the manufacturers (even if these prices exceed the lowest prices) in cases where, for special reasons, the physician or dentist who issued the prescription wrote on it, in his handwriting, that no substitutions are allowed.

— Where a beneficiary refuses a substitution and insists on receiving the more expensive product prescribed, the pharmacist may charge the beneficiary the difference between the price of the product prescribed and the lowest price (the price reimbursed by the Régie).

### 2.2.2 Exception to the basic principle

The lowest price method does not apply to a drug (generic name) where, for therapeutic or other reasons, the drug is no longer considered desirable, even if it has been on the list for fifteen years or more and is produced by two or more manufacturers.

### 2.2.3 Requirements

An accredited manufacturer, in keeping with its commitment, must submit a guaranteed selling price, per package size, for each product it wishes to have included in the List of Medications. The number of package sizes is usually limited to two.

Under the lowest price method, a manufacturer may authorize its guaranteed selling price to be adjusted to the price of the lowest-priced product, either when the List of Medications is updated, when the manufacturer's prices are submitted, or after the list is published.

If the manufacturer authorizes the adjustment when it submits its prices, the price indicated on the list for that product will be the lowest price.

When a manufacturer authorizes its price to be adjusted to the lowest price, that price becomes its guaranteed sell-

ing price and remains subject to all the provisions of the *Regulation respecting the conditions on which manufacturers and wholesalers of medications shall be recognized*.

#### **2.2.4 Grouping of pharmaceutical forms and strengths**

For the purpose of applying the lowest price method, certain pharmaceutical forms or strengths in terms of active ingredients may be grouped together under the same generic name.

Thus, under a given generic name, slow-release products are grouped together with regular-release products. The price payable is then established on the basis of the price of the lowest-priced product, taking into account the corresponding dosages.

Pharmaceutical forms and strengths of certain drugs are not grouped together where, for therapeutic or other reasons, this is not considered desirable.

#### **2.3 Maximum amount**

The Minister may, where particular circumstances warrant, establish a maximum amount paid for a drug. In such a case, the price payable must not exceed the maximum amount indicated on the List of Medications.

#### **2.4 Accredited drug wholesaler's mark-up**

The drug wholesaler's mark-up on a drug is payable only if the drug was actually purchased through an accredited wholesaler. For certain expensive drugs, the mark-up may be limited to a maximum amount, according to the terms and conditions described below.

In establishing its selling prices, an accredited drug wholesaler must not add more than 9 % to the manufacturer's guaranteed selling price for the package size purchased.

For the application of this provision, the wholesaler must, in keeping with its commitment, declare the percentage mark-up that it must add exclusively to the manufacturer's guaranteed selling price for all drugs appearing on the list during the period for which the list is valid, except drugs for which different selling prices for wholesalers and pharmacists are submitted (see section 1.1).

Accredited drug wholesalers, approved distribution centres, and their mark-ups are listed in Appendix II.

#### **2.4.1 Maximum mark-up**

Under the regulatory provisions, the mark-up on certain expensive drugs may be limited to a maximum amount.

For these expensive drugs, the wholesaler's mark-up is limited to a maximum amount of \$20. The products to which this measure applies are those whose guaranteed selling price to wholesalers, for the smallest package size or its indivisible multiple, is \$400 or more. The price appearing on the list *does not include* the mark-up.

The products for which the wholesaler's mark-up is limited to \$20 are listed in Schedule III.

#### **2.5 Conditions of supply**

Only those products appearing on the list and purchased through an accredited drug manufacturer or wholesaler may be billed to the Régie by a pharmacist.

When obtaining drug supplies, pharmacists must apply sound management practices and make rational purchases based on the quantity of a drug dispensed over a period of at least 30 days.

#### **2.6 Price payable for drugs supplied by institutions**

Under section 37 of the *Pharmacy Act* (R.S.Q., c. P-10), an institution is authorized to supply drugs to persons other than persons who are admitted or are registered with it. In addition to the responsibilities entrusted to them under the *Regulation respecting the application of the Hospital Insurance Act*, institutions may, under the basic plan, bill for drugs appearing on the List of Medications, prepared by the Minister pursuant to section 60 of the *Act respecting prescription drug insurance and amending various legislative provisions*, where these drugs are supplied to beneficiaries of the basic plan.

In such a case, the price payable to the institution is the lesser of its actual purchase price and the price established in accordance with the method described in the list.

### **3. EXTEMPORANEOUS PREPARATIONS**

#### **3.1 Definition**

An extemporaneous preparation is any drug that is prepared in a pharmacy from a prescription, as opposed to an officinal preparation, which is already prepared.

### 3.2 Extemporaneous preparations whose cost is covered by the basic plan

The cost of an extemporaneous preparation is covered by the basic plan if it is an extemporaneous mixture that is not equivalent to a drug already manufactured and that represents:

— A preparation intended for internal use and manufactured from an oral form of a drug already appearing on the List of Medications. This extemporaneous preparation must not contain any other active substance.

— A preparation intended for internal use and resulting from the mixture of two or more of the following products in the form of an oral suspension, oral solution or syrup: erythromycin, hydroxyzine, nystatin, tetracycline and trimethoprim in association, where required, with one or more of the following vehicles: simple syrup, distilled water or saline solution.

— A topical-use preparation composed of a mixture of a drug already appearing in Class 84:00 *Skin and mucous membranes* on the List of Medications, and one or more products for the following extemporaneous preparations: salicylic acid, sulfur and tar in association, where required, with one or more vehicles, solvents or adjuvants.

— A topical-use preparation composed of one or more of the following products: salicylic acid, sulfur, tar and hydrocortisone with a cream, ointment or lotion base, with the exception of a sole hydrocortisone base having a strength of less than 1 %.

— An ophthalmic preparation containing amikacin, cefazolin, vancomycin, gentamicin or tobramycin in strengths of 3 mg/mL or more.

— A solution or oral suspension of methadone or of phytonadione.

— A topical preparation of nitrogen mustard (mechlorethamine hydrochloride).

The products for extemporaneous preparations and for vehicles, solvents or adjuvants payable appear in a special section of the List of Medications.

### 3.3 Price payable

The method applicable for establishing the price payable by the Régie for products used for extemporaneous preparations and for vehicles, solvents, or adjuvants is the pharmacist's cost price.

## 4. EXCEPTIONAL MEDICATIONS

### 4.1 Definition

The List of Medications contains the exceptional medications provided for in a government regulation. The cost of these medications is covered by the basic plan in the cases and on the conditions provided for in that regulation, especially as regards therapeutic indications.

### 4.2 Objectives

a) To ensure that the cost of a drug classified as an exceptional medication is covered by the basic plan only where the drug is used for the therapeutic indications recognized by the Conseil consultatif de pharmacologie.

b) To permit, on an exceptional basis, payment for a drug appearing on the list under the heading *Exceptional medications*, where the drug:

— is considered effective for limited indications, neither its effectiveness nor the cost per treatment warranting its regular and continuous use for other indications;

— is generally reserved for hospitalized patients, but could be required for particular medical reasons.

### 4.3 Classification of exceptional medications

Drugs corresponding to the definition of exceptional medications are classified on the List of Medications separately, under the heading *Exceptional medications*.

### 4.4 Authorization for payment and duration of authorization

Drugs classified as exceptional medications are included in the basic plan coverage where the following conditions are fulfilled:

1° in the case of persons whose coverage under the basic plan is provided by the Régie de l'assurance-maladie du Québec, a prior request for authorization, duly completed in accordance with the form prescribed to that effect in the *Regulation respecting forms and statements of fees under the Health Insurance Act* (R.R.Q., 1981, c. A-29, r. 2) was sent to the Régie;

2° in the case of persons whose coverage under the basic plan is provided by insurers transacting group insurance or by administrators of private-sector employee benefit plans, a prior request for authorization, if required under the applicable group insurance contract or employee benefit plan, was sent to the insurer or to the administrator of the employee benefit plan, according to the terms and conditions provided for in that contract or plan.

Notwithstanding the foregoing, these drugs are covered only for the duration authorized, as the case may be, by the Board, the insurer, or the administrator of the employee benefit plan concerned, if the medications are prescribed for the therapeutic indications stipulated for each of them.

#### **4.5 Therapeutic indications recognized for payment purposes**

The therapeutic indications for drugs classified as exceptional medications whose cost is covered by the basic plan are listed in Appendix IV.

### **5. SUPPLIES**

The List of Medications may include certain supplies considered by the Minister to be essential for the administration of prescription drugs. The supplies whose cost is covered by the basic plan appear on the list under the heading *Supplies*.

#### **5.1 Price payable**

The price payable for supplies is the pharmacist's cost price.

**APPENDIX I**

MANUFACTURERS THAT SUBMITTED  
DIFFERENT GUARANTEED SELLING PRICES  
FOR WHOLESALERS AND PHARMACISTS

<b>Manufacturer</b>	<b>Difference between pharmacist's GSP and wholesaler's GSP</b>

Bristol	Vepesid Cap. 50 mg	20 capsules
Roche	Vesanoid Cap. 10 mg	100 capsules
Zeneca	Zoladex-LA Implant 10.8 mg	1 implant
G.W.	Zovirax Perf. I.V. Sol. 50 mg/mL (20 mL) 5 vials	
Lilly	Zyprexa Tab. 10 mg	60 tablets

**APPENDIX IV****EXCEPTIONAL MEDICATIONS, WITH  
RECOGNIZED INDICATIONS FOR  
PAYMENT PURPOSES**

- (1) **ACYCLOVIR, tab.:**
- (a) in immunocompromised persons, for curative and preventive treatment of severe herpes virus infections;
  - (b) in immunocompetent persons:
    - (i) for early treatment of zona, that is, within 48 to 72 hours following the appearance of lesions;
    - (ii) for suppressive treatment of recurrent herpes, that is, 6 episodes or more per year;
    - (iii) for curative treatment of severe herpes virus infections;
    - (iv) for early curative treatment of varicella-zoster infections in persons 13 years of age or older and in children over 12 months of age suffering from chronic skin diseases or pulmonary disorders or receiving a long-term salicylate-based therapy;
- (2) **ACYCLOVIR, top. cr., top. oint.:** for local treatment of herpes virus infections in immunocompromised persons;
- (3) **ALENDRONATE:**
- (a) for treatment of persons having had osteoporosis-related fractures;
  - (b) for treatment of symptomatic Paget's disease;
  - (c) for treatment of persons unable to tolerate etidronate;
- (4) **CALCIUM ALGINATE FIBRE:** for treatment of persons suffering from serious burns or severe cutaneous ulcers;
- (5) **ALUMINUM HYDROXIDE:** as a phosphate binder in persons suffering from severe renal failure;
- (6) **ANETHOL TRITHIONE:** for treatment of persons suffering from severe xerostomia;
- (7) **BISACODYL:** for treatment of constipation related to a medical condition and not responding to non-pharmacological measures;
- (8) **BUTORPHANOL TARTRATE, nasal sol.:** for non-prophylactic treatment of migraine episodes or Horton's syndrome in persons for whom treatment with other opi-
- ate analgesics or other drug therapies is ineffective or poorly tolerated;
- (9) **CALCIUM ACETATE:** as a phosphate binder in persons suffering from severe renal failure;
- (10) **CALCIUM CARBONATE:**
- (a) as a calcium supplement for persons suffering from hypoparathyroidism, lactase deficiency or malabsorption;
  - (b) as a phosphate binder in persons suffering from severe renal failure;
- (11) **CALCIUM GLUCONATE/CALCIUM GLUCO-HEPTONATE:**
- (a) as a calcium supplement for children suffering from bovine protein or lactose intolerance;
  - (b) as a calcium supplement for persons suffering from hypoparathyroidism, lactase deficiency or malabsorption and unable to take tablets;
- (12) **CAPSAICIN, top. cr.:** for treatment of pain caused by episodes of herpes zoster infection or related to peripheral neuropathies;
- (13) **CARBOXYMETHYLCELLULOSE SODIUM:** for treatment of keratoconjunctivitis sicca or other severe conditions accompanied by markedly reduced tear production, where preservatives are not tolerated or are contraindicated;
- (14) **CARVEDILOL:** for treatment of stable symptomatic congestive heart failure in persons receiving a diuretic and an angiotensin converting enzyme inhibitor;
- (15) **SODIUM CHLORIDE, dres.:** for treatment of persons suffering from serious burns or severe cutaneous ulcers;
- (16) **SODIUM CITRATE/SODIUM LAURYL SULFO-ACETATE:** for treatment of constipation related to a medical condition and not responding to non-pharmacological measures;
- (17) **CLINDAMYCIN PHOSPHATE, vag. cr.:** for treatment of bacterial vaginosis during the first term of pregnancy;
- (18) **CLINDAMYCIN PHOSPHATE, top. sol.:** for treatment of acne vulgaris in persons for whom topical erythromycin is ineffective or poorly tolerated;

(19) DESMOPRESSIN ACETATE, tab.: for treatment of diabetes insipidus in persons unable to use a desmopressin nasal spray or nasal solution;

(20) DICLOFENAC SODIUM, oph. sol.: for treatment of ocular inflammation in persons for whom ophthalmic corticosteroids are not indicated;

(21) DIPHENHYDRAMINE HYDROCHLORIDE: for adjuvant treatment of certain psychiatric disorders and of Parkinson's disease;

(22) DIPYRIDAMOLE:

(a) for prevention of thromboembolic accidents in persons having valvular or vascular prostheses or having undergone bypass surgery with a vein graft;

(b) for prevention of thromboembolic accidents in persons for whom the conventional therapy is ineffective or contraindicated;

(23) DOCUSATE CALCIUM: for treatment of constipation related to a medical condition and not responding to non-pharmacological measures;

(24) DOCUSATE SODIUM: for treatment of constipation related to a medical condition and not responding to non-pharmacological measures;

(25) DORNASE ALFA:

(a) during initial treatment in persons over 5 years of age suffering from cystic fibrosis and whose forced vital capacity is more than 40 percent of the predicted value. The maximum initial duration of authorization will be 3 months;

(b) during maintenance treatment in persons for whom the physician provides evidence of a beneficial clinical effect. The authorization will have a maximum duration of one year;

(26) DORZOLAMIDE HYDROCHLORIDE:

(a) for adjuvant treatment of glaucoma where treatment with a beta-blocker produces insufficient control of ocular tension;

(b) for treatment of glaucoma where a beta-blocker is not tolerated or is contraindicated;

(27) EPOETIN ALFA:

(a) for treatment of symptomatic anemia related to severe chronic renal failure (during the dialysis stage or before the dialysis stage begins);

(b) for treatment of non-hemolytic symptomatic anemia necessitating regular transfusions in persons having no iron, folic acid or vitamin B12 deficiency and where the anemia persists despite treatment of the underlying causes. In such cases, the maximum initial duration of authorization will be 3 months;

(28) ESTRADIOL-17 $\beta$ : for persons unable to take oral estrogens because of thromboembolic disorders or unable to tolerate oral estrogens;

(29) ESTRADIOL-17 $\beta$ /NORETHINDRONE ACETATE: for persons unable to take oral estrogens because of thromboembolic disorders or unable to tolerate oral estrogens or progestogens;

(30) FAMCICLOVIR:

(a) for early treatment of zona, that is, within 48 to 72 hours following the appearance of lesions;

(b) for curative treatment of severe infectious episodes of recurrent genital herpes;

(c) for suppressive treatment of recurrent genital herpes;

(31) FENTANYL, skin patch: for relief of pain in persons unable to tolerate oral morphine preparations or unable to swallow because of a digestive pathology;

(32) FILGRASTIM:

(a) for treatment of persons undergoing cycles of moderately or highly myelosuppressive chemotherapy ( $\leq 40$  percent risk of febrile neutropenia);

(b) for treatment of persons at risk of developing severe neutropenia during chemotherapy;

(c) in subsequent cycles of chemotherapy, for treatment of persons having suffered from severe neutropenia (neutrophil count below  $0.5 \times 10^9/L$ ) during the first cycles of chemotherapy and for whom a reduction in the antineoplastic dose is inappropriate;

(d) during chemotherapy undergone by children suffering from solid tumours;

(e) for treatment of persons suffering from medullary aplasia (neutrophil count below  $0.5 \times 10^9/L$ ) and awaiting curative treatment by means of a bone marrow transplant or with antithymocyte serum;

(f) for treatment of persons suffering from congenital or hereditary neutropenia whose neutrophil count is below  $0.5 \times 10^9/L$ ;

(g) for treatment of HIV-infected persons suffering from neutropenia secondary to antiretroviral drugs, or secondary to ganciclovir in the case of persons who are unable to tolerate foscarnet and whose neutrophil count remains below  $0.5 \times 10^9/L$ , despite temporary stopping of medication or reduction of dosage;

(h) to stimulate bone marrow in the donor in the case of an allograft, or in the recipient in the case of an autograft;

(33) FLUCONAZOLE, oral susp.:

(a) for treatment of oropharyngeal candidiasis in persons for whom the conventional therapy is ineffective or poorly tolerated;

(b) for treatment of esophageal candidiasis;

(34) NUTRITIVE FORMULAS - CASEIN-BASED (INFANTS AND CHILDREN):

(a) for infants and children allergic to complete milk proteins. In such cases, the maximum initial duration of authorization will be up to the age of 9 months. The results of re-exposure to milk must be provided in order for utilization to continue;

(b) for infants and children suffering from galactosemia and requiring a lactose-free diet;

maximum initial duration of authorization: 3 months;

(c) for infants and children suffering from persistent diarrhea or other severe gastrointestinal problems;

maximum initial duration of authorization: 3 months;

(35) NUTRITIVE FORMULAS - POLYMERIZED GLUCOSE: to increase the caloric content of other nutritive formulas;

maximum initial duration of authorization: 3 months;

(36) NUTRITIVE FORMULAS - FRACTIONATED COCONUT OIL: for persons unable to effectively digest or absorb long-chain fatty foods;

(37) NUTRITIVE FORMULAS - SKIM MILK/COCONUT OIL: for persons unable to effectively digest or absorb long-chain fatty foods;

(38) NUTRITIVE FORMULAS - MONOMERIC:

(a) for total oral feeding, and for enteral feeding of persons requiring liquid nutritive formulas as a source of nutrition, in presence of esophageal dysfunction or dysphagia, maldigestion or malabsorption;

(b) for children suffering from Crohn's disease;

(c) for persons suffering from cystic fibrosis;

maximum initial duration of authorization: 3 months;

(39) NUTRITIVE FORMULAS - POLYMERIC WITH RESIDUES:

(a) for total oral feeding, and for enteral feeding of persons requiring liquid nutritive formulas as a source of nutrition, in presence of esophageal dysfunction or dysphagia, maldigestion or malabsorption;

(b) for children suffering from Crohn's disease;

(c) for persons suffering from cystic fibrosis;

maximum initial duration of authorization: 3 months;

(40) NUTRITIVE FORMULAS - LOW-RESIDUE POLYMERIC:

(a) for total oral feeding, and for enteral feeding of persons requiring liquid nutritive formulas as their source of nutrition, in presence of esophageal dysfunction or dysphagia, maldigestion or malabsorption;

(b) for children suffering from Crohn's disease;

(c) for persons suffering from cystic fibrosis;

maximum initial duration of authorization: 3 months;

(41) NUTRITIVE FORMULAS - PROTEINS/CARBOHYDRATES & LIPIDS (INFANTS AND CHILDREN): for infants and children requiring a product low in mineral content;

maximum initial duration of authorization: 3 months;

(42) GANCICLOVIR, caps.: for maintenance treatment of cytomegalovirus (CMV) retinitis in immunocompromised persons;

(43) GRANISETRON HYDROCHLORIDE:

(a) during the first day of a highly emetic chemotherapy or radiotherapy treatment;

(b) in children during highly emetic chemotherapy or radiotherapy;

(c) during chemotherapy or radiotherapy undergone by persons for whom the conventional antiemetic therapy is ineffective or poorly tolerated;

(44) MINERAL OIL: for treatment of constipation related to a medical condition and not responding to non-pharmacological measures;

(45) HYDROXYPROPYL METHYLCELLULOSE: for treatment of keratoconjunctivitis sicca or other severe conditions accompanied by markedly reduced tear production;

(46) HYDROXYPROPYL METHYLCELLULOSE/DEXTRAN 70: for treatment of keratoconjunctivitis sicca or other severe conditions accompanied by markedly reduced tear production;

(47) IDARUBICIN (hydrochloride): for treatment of acute myelocytic leukemia in adults;

(48) INDOMETHACIN, oph. sol.: for treatment of ocular inflammation in persons for whom ophthalmic corticosteroids are not indicated;

(49) INSULIN LISPRO: for persons suffering from type I diabetes not controlled by intensive insulin therapy with other insulin preparations;

(50) INTERFERON BETA 1-B: for treatment of persons suffering from cyclic remitting multiple sclerosis who are capable of walking, even if they require assistance, and who have had 2 or more episodes of the disease within the last 2 years;

The physician must provide, at the beginning of treatment and with each subsequent request, the following information: number of episodes per year, result on EDSS scale, and adjuvant treatments;

The maximum initial duration of authorization is 6 months. When submitting subsequent requests, the physician must provide evidence of a beneficial effect (absence of deterioration);

(51) KETOROLAC TROMETHAMINE: for treatment of ocular inflammation in persons for whom ophthalmic corticosteroids are not indicated;

(52) LACTULOSE:

(a) for treatment of hepatic encephalopathy;

(b) for treatment of constipation related to a medical condition and not responding to non-pharmacological measures;

(53) MAGNESIUM GLUCOHEPTONATE, oral sol.: for treatment of persons suffering from hypomagnesemia;

(54) MAGNESIUM GLUCONATE, oral sol.: for treatment of persons suffering from hypomagnesemia;

(55) MAGNESIUM HYDROXIDE: for treatment of constipation related to a medical condition and not responding to non-pharmacological measures;

(56) MAGNESIUM HYDROXYDE/ALUMINUM HYDROXYDE: as a phosphate binder in persons suffering from severe renal failure;

(57) MEGESTROL ACETATE:

(a) for hormone therapy in the treatment of cancer;

(b) for hormone replacement therapy in persons unable to tolerate oral progestogens or for whom oral progestogens are contraindicated;

(58) METRONIDAZOLE, vag. gel:

for treatment of bacterial vaginosis during the second and third terms of pregnancy;

for treatment of bacterial vaginosis in persons unable to tolerate metronidazole administered orally;

(59) MIDAZOLAM:

(a) in palliative care, for persons having an obstruction of the upper respiratory tract or uncontrollable symptoms requiring titrated sedation;

(b) in palliative care, for non-prophylactic treatment of generalized convulsive seizures and of myoclonia where the intravenous route is not advisable;

(60) MIDODRINE HYDROCHLORIDE: for treatment of orthostatic hypotension in persons for whom the conventional treatment is insufficient or contraindicated;

(61) MINOCYCLINE HYDROCHLORIDE: for treatment of acne or other superficial skin infections in persons for whom tetracycline would be indicated but is ineffective or poorly tolerated;

(62) MULTIVITAMINS: for persons suffering from cystic fibrosis;

(63) ONDANSETRON HYDROCHLORIDE:

(a) during the first day of a highly emetic chemotherapy or radiotherapy treatment;

(b) during highly emetic chemotherapy or radiotherapy undergone by children;

(c) during chemotherapy or radiotherapy undergone by persons for whom the conventional antiemetic treatment is ineffective or poorly tolerated;

(64) CARBOXYMETHYLCELLULOSE DRESSING: for treatment of persons suffering from serious burns or severe cutaneous ulcers;

(65) ACTIVATED CHARCOAL/SILVER DRESSING: for treatment of persons suffering from serious burns or severe cutaneous ulcers;

(66) COLLAGEN/ALGINATE DRESSING: for treatment of persons suffering from serious burns or severe cutaneous ulcers;

(67) HYDROCOLLOIDAL DRESSING: for treatment of persons suffering from serious burns or severe cutaneous ulcers;

(68) HYDROCOLLOIDAL/ALGINATE DRESSING: for treatment of persons suffering from serious burns or severe cutaneous ulcers;

(69) HYDROGEL DRESSING: for treatment of persons suffering from serious burns or severe cutaneous ulcers;

(70) SEMIPERMEABLE DRESSING: for treatment of persons suffering from serious burns or severe cutaneous ulcers;

(71) PARAFFIN/MINERAL OIL: for treatment of keratoconjunctivitis sicca or other severe conditions accompanied by markedly reduced tear production;

(72) PENTOXIFYLLINE: for non-prophylactic treatment of persons suffering from venous insufficiency and having cutaneous ulcers;

(73) SODIUM PHOSPHATE MONOBASIC/SODIUM PHOSPHATE DIBASIC: for treatment of constipation related to a medical condition and not responding to non-pharmacological measures;

(74) PILOCARPINE HYDROCHLORIDE, tab.: for treatment of xerostomia occurring during radiotherapy;

(75) POLYSORBATE 80/VITAMIN A: for treatment of keratoconjunctivitis sicca or other severe conditions accompanied by markedly reduced tear production;

(76) HYDROPHILIC POLYURETHANE, dres.: for treatment of persons suffering from serious burns or severe cutaneous ulcers;

(77) POLYVINYL ALCOHOL: for treatment of keratoconjunctivitis sicca or other severe conditions accompanied by markedly reduced tear production;

(78) POLYVINYL ALCOHOL/POLYETHYLENE GLYCOL 6000: for treatment of keratoconjunctivitis sicca or other severe conditions accompanied by markedly reduced tear production;

(79) POLYVINYL ALCOHOL/POVIDONE: for treatment of keratoconjunctivitis sicca or other severe conditions accompanied by markedly reduced tear production;

(80) PSYLLIUM MUCILAGE:

(a) for treatment of constipation related to a medical condition and not responding to non-pharmacological measures;

(b) for treatment of chronic diarrhea;

(81) SENNOSIDES A & B: for treatment of constipation related to a medical condition and not responding to non-pharmacological measures;

(82) SOMATROPIN:

(a) for treatment of children suffering from delayed growth due to insufficient secretion of endogenous growth hormone, where they meet the following criteria:

- untermiated growth, a growth rate for the child's bone age below the 25th percentile (calculated over at least a one-year period), and a serum level of somatropin below 8 ng/mL (measured in two pharmacological tests) or between 8 and 10 ng/mL in tests repeated twice at a 6-month interval. The one-year observation period does not apply to young children suffering from hypoglycemia secondary to growth hormone deficiency;
- excluded are children carrying a Turner's syndrome or suffering from achondroplasia or delayed growth of a genetic or familial type;
- excluded are children whose bone age has reached 15 years for girls and 16 years for boys;
- excluded are children whose growth rate, evaluated on two consecutive visits (at a 3-month interval), falls below 4 cm per year during treatment;

(b) for treatment of children suffering from delayed growth related to chronic renal failure until they undergo a kidney transplant, where they meet the following criteria:

- untermiated growth, a glomerular filtration rate  $\leq 75$  mL/min./1.73 m<sup>2</sup>, and a HSDS  $\leq$  a standard deviation of  $-2$  (HSDS = height compared to the average of normal values for the child's age and sex) or a  $\Delta$  HSDS  $<$  a standard deviation of 0 where the

child's height is below the 10th percentile (based on minimum observation periods of 6 months for children over the age of one and 3 months for children under the age of one);

- excluded are children who have had a pseudotumour, a malignant tumour (a child with a tumour that has been stable for more than 12 months may be eligible) or an epiphysiolysis;
- excluded are children in whom, during treatment, an ossification of the conjugative cartilages is observed, and children who have reached their final predicted height;
- excluded are children in whom, during treatment, complications such as hip problems, a pseudotumour, uncontrolled hyperparathyroidism or a malignant tumour are observed;
- excluded are children in whom, during treatment, no response (no increase in  $\Delta$  HSDS in the first 12 months of treatment) is observed, and children whose growth rate, evaluated on two consecutive visits (at a 3-month interval), falls below 2 cm per year despite an adjustment in the dosage;

(83) SOMATREM:

(a) for treatment of children suffering from delayed growth due to insufficient secretion of endogenous growth hormone, where they meet the following criteria:

- untermiated growth, a growth rate for the child's bone age below the 25th percentile (calculated over at least a one-year period), and a serum level of somatropin below 8 ng/mL (measured in two pharmacological tests) or between 8 and 10 ng/mL in tests repeated twice at a 6-month interval. The one-year observation period does not apply to young children suffering from hypoglycemia secondary to growth hormone deficiency;
- excluded are children carrying a Turner's syndrome or suffering from achondroplasia or delayed growth of a genetic or familial type;
- excluded are children whose bone age has reached 15 years for girls and 16 years for boys;
- excluded are children whose growth rate, evaluated on two consecutive visits (at a 3-month interval), falls below 4 cm per year during treatment;

(b) for treatment of children suffering from delayed growth related to chronic renal failure until they undergo a kidney transplant, where they meet the following criteria:

- untermiated growth, a glomerular filtration rate  $\leq 75$  mL/min./1.73 m<sup>2</sup>, and a HSDS  $\leq$  a standard deviation of -2 (HSDS = height compared to the average of normal values for the child's age and sex) or a  $\Delta$  HSDS  $<$  a standard deviation of 0 where the

child's height is below the 10th percentile (based on minimum observation periods of 6 months for children over the age of one and 3 months for children under the age of one);

- excluded are children who have had a pseudotumour, a malignant tumour (a child with a tumour that has been stable for more than 12 months may be eligible) or an epiphysiolysis;
- excluded are children in whom, during treatment, an ossification of the conjugative cartilages is observed, and children who have reached their final predicted height;
- excluded are children in whom, during treatment, complications such as hip problems, a pseudotumour, uncontrolled hyperparathyroidism or a malignant tumour are observed;
- excluded are children in whom, during treatment, no response (no increase in  $\Delta$  HSDS in the first 12 months of treatment) is observed, and children whose growth rate, evaluated on two consecutive visits (at a 3-month interval), falls below 2 cm per year despite an adjustment in the dosage;

(84) SORBITOL: for treatment of constipation related to a medical condition and not responding to non-pharmacological measures;

(85) TOCOPHERYL dl-ALFA ACETATE: for prevention and treatment of neurological manifestations associated with malabsorption of vitamin E;

(86) BOTULINUM TOXIN TYPE A: for treatment of cervical dystonia, blepharospasm, strabismus and other severe spasticity conditions;

(87) TRETINOIN, top. cr., top. gel, top. sol.: for treatment of acne;

(88) VALACYCLOVIR HYDROCHLORIDE:

(a) for early treatment of zona, that is, within 48 to 72 hours following the appearance of lesions;

(b) for curative treatment of severe infectious episodes of recurrent genital herpes.
