# 1. NOTES

#### 1.1 Brief description

The territory of the ecological reserve described herein chiefly covers the valley of the upstream portion of Grande Rivière and its tributaries.

### 1.2 Definitions

In this technical description, "bank" means the natural high water mark of a watercourse. The right and left banks are the right and left sides of a watercourse when looking in the direction of the current. The banks delimit its bed. The watercourses bordering the ecological reserve form part of it and may be intermittent (gullies).

A "nick point" is a place of abrupt change in the gradient.

#### 1.3 Roads

The roads are deemed to have a right-of-way of 35 metres in width.

#### 1.4 Directions

Given the winding boundaries of the territory described herein, the cardinal and intercardinal points are mean directions.

#### 5. Coordinates

The point coordinates are given in metres and have been referenced on the map to the scale of 1:20 000 prepared by the Ministère des Ressources naturelles du Québec, folios 22A 07-200-0202, 22A 10-200-0101, 22A 10-200-0102, 22A 10-200-0201, 22A 10-200-0202, 22A 11-200-0102 and 22A 11-200-0202, in reference to the Québec coordinates system, the SCOPQ, Modified Transverse Mercator projection (MTM), Time Zone 5 (central meridian 64(30(00( West), North American Datum 1983 (NAD 83).

#### 1.6 Measures

The measures are given in the International System of Units (SI).

The directions are bearings in accordance with the Québec coordinates system mentioned above.
