### SCHEDULE

#### ROADS UNDER THE MANAGEMENT OF THE MINISTER OF TRANSPORT

#### EXPLANATORY NOTE

#### A. CORRECTIONS TO DESCRIPTIONS, ADDITIONS, DELETIONS

The roads identified in the “Corrections to descriptions”, “Additions” and “Deletions” divisions appearing in the Schedule to this Order in Council are described under the following 5 headings:

- (1) Route class;
- (2) Section identification;
- (3) Name;
- (4) Beginning of maintenance;
- (5) Length in km.

**(1) Route class**

The designation of the route classes is taken from the functional classification established by the Ministère des Transports.

**(2) Section identification**

Roads are identified by a sequence of figures composed of 7 different groups:

- Road:
- Group 1: road number;
  - Group 2: road segment number;
  - Group 3: road section number;
- Sub-road:
- Group 4: the only figure other than zero that may appear in this group is 3, and it is used to identify one or more ramps;
  - Group 5: this group of figures indicates the sequential number of an intersection within a road segment;
  - Group 6: a letter identifying a ramp, if any;
  - Group 7: a letter identifying the type of roadway.  
(C: contiguous S: separate).

**(3) Name**

For roads whose number is lower than 1 000, the road number is indicated instead of the road name. For roads whose number is 10 000 or more, the road name is indicated instead of the road number.

Where there are one or more ramps along a road section, the total number of ramps for that section is also indicated; the combined length of all the ramps is indicated under "Length in kilometres".

**(4) Beginning of maintenance**

The description of a physical landmark used to situate the beginning of a road section is indicated.

**(5) Length in kilometres**

The length in kilometres is indicated for each road or part of a road. That length, which is determined by the Minister of Transport, corresponds to the actual distance that a vehicle would travel between 2 points without taking into account the configuration of the road (number of lanes, extra width, etc.). Thus, the length is the same whether the road is an autoroute or a feeder road.

**B. CHANGES IN WIDTH OF RIGHT-OF-WAY**

The roads identified in the "Changes in width of right-of-way" division appearing in the Schedule to this Order in Council are described for each municipality in which they are located under the following 6 headings:

**(1) Section identification**

From now on, the roads are identified by a sequence of figures composed of 3 different groups:

- Route:
- Group 1: road number;
  - Group 2: road segment number;
  - Group 3: road section number;

**(2) Name****(3) Name of land surveyor****(4) Minute number****(5) Plan number****(6) Length in km****C. GEOMETRIC REDEFINITIONS**

The roads identified in the "Geometric redefinitions" division appearing in the Schedule to this Order in Council are described by using the 5 headings of the above "A" division and the plan number, the name of the land surveyor and his minute number.

Note: Due to technical constraints, the place names appearing in the Schedules do not necessarily comply with the standards of the Commission de toponymie.
