
Regulations and other acts

M.O., 2001-012

Minister's Order making the Regulation to amend the Regulation respecting the List of medications covered by the basic prescription drug insurance plan, dated 17 September 2001

An Act respecting prescription drug insurance (R.S.Q., c. A-29.01)

THE MINISTER OF STATE FOR HEALTH AND SOCIAL SERVICES AND MINISTER OF HEALTH AND SOCIAL SERVICES,

CONSIDERING section 60 of the Act respecting prescription drug insurance (R.S.Q., c. A-29.01);

CONSIDERING Minister's Order 1999-014 dated 15 September 1999 of the Minister of State for Health and Social Services and Minister of Health and Social Services making the Regulation respecting the List of medications covered by the basic prescription drug insurance plan;

CONSIDERING that it is necessary to update the list of insured medications attached to that regulation;

CONSIDERING that the Conseil consultatif de pharmacologie has been consulted on the draft regulation;

MAKES the Regulation to amend the Regulation respecting the List of medications covered by the basic prescription drug insurance plan, the text of which is attached hereto.

Québec, 17 September 2001

RÉMY TRUDEL,
*Minister of State for Health and Social Services
and Minister of Health and Social Services*

Regulation to amend the Regulation respecting the List of medications covered by the basic prescription drug insurance plan*

An Act respecting prescription drug insurance (R.S.Q., c. A-29.01, s. 60)

1. The Regulation respecting the List of medications covered by the basic prescription drug insurance plan is amended by substituting Schedule 1 attached hereto for Schedule 1.

2. This Regulation comes into force on 1 October 2001.

* The Regulation respecting the List of medications covered by the basic prescription drug insurance plan, made by Minister's Order 1999-014 dated 15 September 1999 (1999, *G.O.* 2, 3197) of the Minister of State for Health and Social Services and Minister of Health and Social Services, was last amended by Minister's Orders 2000-016 dated 15 September 2000 (2000, *G.O.* 2, 4637) and 2000-019 dated 25 October 2000 (2000, *G.O.* 2, 5268), 2000-020 dated 8 December 2000 (2000, *G.O.* 2, 5933), 2001-002 dated 23 January 2001 (2001, *G.O.* 2, 1040), 2001-003 dated 7 March 2001 (2001, *G.O.* 2, 1419), 2001-006 dated 12 June 2001 (2001, *G.O.* 2, 3049) and 2001-010 dated 16 July 2001 (2001, *G.O.* 2, 4227) of that Minister. For previous amendments, refer to the *Tableau des modifications et Index sommaire*, Éditeur officiel du Québec, 2000, updated to 1 November 2000.

List of medications 1 October 2001

1. ESTABLISHING THE PRICES INDICATED ON THE *LIST OF MEDICATIONS*

The prices indicated on the *List of Medications* are established according to the “guaranteed selling price” concept, in keeping with the manufacturer’s commitment and in accordance with the method of establishing drug prices provided for in section 60 of the Act respecting prescription drug insurance.

However, for certain drugs no price is indicated on the list, in which case the price payable is the pharmacist’s cost price. Such drugs include:

- drugs produced by non-accredited manufacturers but considered unique and essential (identified by the abbreviation “UE” in the “unit price” column);
- products for extemporaneous preparations;
- solvents, vehicles and adjuvants;
- supplies;
- drugs listed by generic name only, with no brand name or manufacturer’s name indicated;
- drugs that have been taken off the market but that remain insured during the period of validity of this edition of the list. In such cases, the abbreviation “W” appears in the “unit price” column.

1.1 Guaranteed selling price

The manufacturer’s commitment stipulates that the manufacturer must submit a guaranteed selling price, per package size, for any drug it wishes to have included on the *List of Medications*. The number of package sizes is limited to two, and the price submitted must reflect prices for quantities that are multiples of these package sizes.

Where the therapeutic use of more than two package sizes has been established, as in the case of certain drugs such as antibiotics in oral suspensions, ophthalmic solutions, and topical creams and ointments, the manufacturer may submit a guaranteed selling price for each package size.

The guaranteed selling price must remain in effect during the period for which the *List of Medications* is valid.

The guaranteed selling price may differ for sales to pharmacists and sales to wholesalers, in which case the difference between the pharmacist’s price and the wholesaler’s price must not exceed 9% for any package size but may be different for each product in question. For a given product, the difference must be the same for all package sizes. A manufacturer’s guaranteed selling price for sales to wholesalers must be the same for all wholesalers.

It should be noted that the guaranteed selling price indicated on the list is the guaranteed selling price for sales to pharmacists.

Manufacturers that have submitted different guaranteed selling prices for sales to pharmacists and sales to wholesalers are listed in Appendix I.

2. ESTABLISHING THE PRICE PAYABLE

The price paid by the Régie de l’assurance maladie is the price at which the drug is sold by an accredited manufacturer or wholesaler. This price is established according to the method described below or, in certain cases, is the maximum price indicated on the list.

2.1 Actual purchase price

The method used to establish the price payable by the Régie de l’assurance maladie is the **actual purchase price method**.

Under this method, the price paid by the Régie de l’assurance maladie to a pharmacist is the price indicated on the edition of the list that is valid at the time the prescription is filled, taking into account the source of supply and the package size.

Where the manufacturer’s name does not appear on the *List of Medications*, the price payable by the Régie de l’assurance maladie is the pharmacist’s cost price. This is true, for example, in the case of products considered unique and essential, products that have been taken off the market but that remain insured during the period of validity of the list, products for which no brand name or manufacturer’s name is indicated, and products appearing in the sections entitled *Products for Extemporaneous Preparations, Vehicles, Solvents or Adjuvants* and *Supplies*.

2.2 The lowest price

For certain drugs (generic names) that have appeared on the *List of Medications* for 15 years or more and that are produced by two or more manufacturers, the lowest price method is used to establish the price payable. This method is based on the lowest guaranteed selling price for sales to pharmacists that is submitted by a manufacturer for a given package size.

2.2.1 The lowest price method

The lowest price method works as follows :

- For a given drug (generic name, dosage form, strength), all products for which the manufacturer has submitted a guaranteed selling price are considered insured and therefore appear on the *List of Medications*.
- The price payable is the lowest price, which is the price of the manufacturer that submitted the lowest guaranteed selling price.
- Where the guaranteed selling price submitted by a manufacturer exceeds the lowest price, this price is payable only where, for particular reasons, the prescriber who issued the prescription wrote on it, in his own handwriting, that no substitutions are allowed.
- Where an insured person refuses a substitution and insists on receiving the more expensive product prescribed, the pharmacist may charge that person the difference between the price of the product prescribed and the lowest price (the price reimbursed by the Régie de l'assurance maladie).

2.2.2 Grouping of dosage forms and strengths

For the purpose of applying the lowest price method, certain dosage forms or strengths in active ingredients may be grouped together under the same generic name.

Thus, under a given generic name, slow-release products are grouped with regular-release products. The price payable is then established on the basis of the price of the least expensive product, taking into account the corresponding dosages.

Dosage forms and strengths are not grouped together where, for therapeutic or other reasons, this is not considered desirable.

2.2.3 Exception to the basic principle

The lowest price method does not apply to a drug (generic name) that, for therapeutic or other reasons, is not considered desirable, even if the drug has appeared on the list for fifteen years or more and is produced by two or more manufacturers.

2.3 Maximum amount

The Minister may establish a maximum amount payable for a drug, in which case the price payable may not exceed the maximum amount indicated on the list.

2.4 Accredited drug wholesaler's mark-up

The drug wholesaler's mark-up is payable only if the drug was actually purchased through an accredited wholesaler. For certain expensive drugs, the mark-up may be limited to a maximum amount, under the terms and conditions described below.

Under this provision, the wholesaler must, in keeping with its commitment, declare the percentage mark-up that it must add exclusively to the manufacturer's guaranteed selling price for drugs appearing on the list during the period for which it is valid, except drugs for which different selling prices for sales to wholesalers and sales to pharmacists are submitted.

Accredited drug wholesalers and their mark-ups for the period of validity of the *List of Medications* are listed in Appendix II.

2.4.1 Maximum mark-up

Under the regulatory provisions, the mark-up on certain expensive drugs may be limited to a maximum amount.

For these drugs, the wholesaler's mark-up is limited to a maximum of \$20. The products to which this measure applies are those whose guaranteed selling price for sales to wholesalers, for the smallest package size or its indivisible multiple, is \$400 or more. The price appearing on the list is the guaranteed selling price for sales to pharmacists and does not include the wholesaler's mark-up.

Products for which the wholesaler's mark-up is limited to \$20 are listed in Appendix III.

2.4.2 Two guaranteed selling prices

Where a manufacturer has submitted different guaranteed selling prices for sales to wholesalers and sales to pharmacists, the price payable is established as follows:

If the difference between the guaranteed selling prices for sales to wholesalers and sales to pharmacists is equal to or greater than 5%, this difference constitutes the wholesaler's mark-up. The price payable is then the guaranteed selling price for sales to pharmacists, except in the case of expensive products, for which the mark-up is limited to \$20. If the difference between the guaranteed selling prices for sales to wholesalers and sales to pharmacists is less than 5%, the price payable is the guaranteed selling price for sales to wholesalers, increased by the wholesaler's mark-up.

2.5 Conditions of supply

The only products for which pharmacists may bill the Régie are those appearing on the list and purchased through a recognized manufacturer or wholesaler.

When obtaining drug supplies, pharmacists must apply sound management practices and make rational purchases based on the quantity of a drug dispensed over a period of at least 30 days.

2.6 Price payable for drugs supplied by institutions

Under section 37 of the Pharmacy Act (R.S.Q., c. P-10), institutions are authorized to supply drugs to persons other than persons admitted or registered with them. In addition to the responsibilities entrusted to them under the Regulation respecting the application of the Hospital Insurance Act, these institutions may bill the Basic Prescription Drug Insurance Plan for drugs appearing on the *List of Medications* drawn up by the Minister pursuant to section 60 of the Act respecting prescription drug insurance, where these drugs are supplied to persons insured under the Basic Prescription Drug Insurance Plan.

In such cases, the price payable to institutions is the lesser of the actual purchase price and the price established according to the method described in the *List of Medications*.

3. EXTEMPORANEOUS PREPARATIONS

3.1 Definition

An extemporaneous preparation is any drug prepared by a pharmacist from a prescription, as opposed to an officinal preparation, which is pre-prepared.

3.2 Extemporaneous preparations whose cost is covered by the Basic Prescription Drug Insurance Plan

The cost of an extemporaneous preparation is covered by the Basic Prescription Drug Insurance Plan if the preparation is an extemporaneous mixture of products appearing on the *List of Medications*, is not equivalent to a drug already manufactured, and consists of:

- A preparation intended for internal use, manufactured from oral forms of drugs already appearing on the *List of Medications* and consisting of
 - a single active substance; or
 - a mixture of a didanosine oral solution and a magnesium hydroxide/aluminum hydroxide suspension.
- A mouthwash preparation resulting from the mixture
 - of two or more of the following drugs in non-injectable form: diphenhydramine hydrochloride, erythromycin, hydroxyzine, lidocaine, magnesium hydroxide/aluminum hydroxide, nystatin, tetracycline and a corticosteroid, in association, where applicable, with one or more vehicles, solvents or adjuvants; or
 - of an oral form of tranexamic acid with one or more vehicles, solvents or adjuvants.
- A preparation for topical use composed of a mixture of a drug listed in Class 84:00 *Skin and Mucous Membrane Agents* and of one or more of the following products for extemporaneous preparations: salicylic acid, sulfur and tar in association, where applicable, with one or more vehicles, solvents or adjuvants.
- A preparation for topical use composed of one or more of the following products: salicylic acid, sulfur, tar and hydrocortisone in a cream, ointment, oil or lotion base, but not a preparation that is only hydrocortisone-based that has a concentration of less than 1%.

- An ophthalmic preparation containing amikacin, cefazolin, vancomycin, gentamicin or tobramycin in concentrations of 3 mg/mL or more.
- A solution or oral suspension of folic acid, methadone or phytonadione.
- A topical preparation of nitrogen mustard (mechlorethamine hydrochloride).

Products for extemporaneous preparations, as well as vehicles, solvents or adjuvants whose price is payable by the Régie are listed in two special sections of *the List of Medications*.

3.3 Price payable

The method applicable for establishing the price payable by the Régie de l'assurance maladie for products for extemporaneous preparations is the price indicated on the list. Where no price is indicated, the price payable is the pharmacist's cost price.

4. EXCEPTIONAL MEDICATIONS

4.1 Objectives

Measures regarding exceptional medications aim to achieve the following objectives:

- (a) to ensure that the cost of a drug classified as an exceptional medication is covered by the Basic Prescription Drug Insurance Plan only when used for the therapeutic indications recognized by the Conseil consultatif de pharmacologie;
- (b) to permit, on an exceptional basis, payment for a drug classified as an exceptional medication where the drug:
 - is considered effective for limited indications, since neither its effectiveness nor the cost of treatment warrants its regular and continuous use for other indications;
 - offers no therapeutic advantages to warrant a higher cost than the cost of using products that have the same pharmacotherapeutic properties and that appear on the *List of Medications*, but where these products are not tolerated, are contraindicated, or have been rendered ineffective by the patient's clinical condition.

4.2 Classification of exceptional medications

Drugs corresponding to the definition of exceptional medications are classified on the *List of Medications* separately, in the section entitled *Exceptional Medications*.

4.3 Authorization for payment and duration of authorization

The exceptional medications listed in Appendix IV are insured under the Basic Prescription Drug Insurance Plan where the following conditions are fulfilled:

- (1) in the case of persons whose basic plan coverage is provided by the Régie de l'assurance maladie, a prior request for authorization, duly completed in accordance with the form prescribed to that effect in the Regulation respecting forms and statements of fees under the Health Insurance Act (R.R.Q., 1981, c. A-29, r. 2) was sent to the Régie;
- (2) in the case of persons whose basic plan coverage is provided by insurers transacting group insurance or by administrators of private-sector employee benefit plans, a prior request for authorization, if required under the applicable group insurance contract or employee benefit plan, was sent to the insurer or to the administrator of the employee benefit plan, according to the terms and conditions provided for in that contract or plan.

Notwithstanding the foregoing, these drugs are covered only for the duration authorized, as the case may be, by the Régie de l'assurance maladie, by the insurer, or by the administrator of the employee benefit plan concerned, if they are prescribed for the therapeutic indications stipulated for each of them.

5. SUPPLIES

The *List of Medications* may include certain supplies considered by the Minister to be essential for the administration of prescription drugs. Supplies whose cost is covered by the Basic Prescription Drug Insurance Plan appear on the list in the sections entitled *Supplies* and *Vehicles, Solvents or Adjuvants*.

5.1 Price payable

The price payable for supplies is the pharmacist's cost price.

APPENDIX I

MANUFACTURERS THAT HAVE SUBMITTED
DIFFERENT GUARANTEED SELLING PRICES FOR
WHOLESALEERS AND PHARMACISTS

Manufacturer		Difference between pharmacist's GSP and wholesaler's GSP
Altimed	Altimed Pharma Inc.	5%

APPENDIX IV**EXCEPTIONAL MEDICATIONS,
WITH RECOGNIZED INDICATIONS
FOR PAYMENT PURPOSES****★ACYCLOVIR, top. cr., top. oint. :**

for local treatment of herpes virus infections in immunocompromised persons;

ALGINATE FIBRE :

for treatment of persons suffering from serious burns or severe cutaneous ulcers;

ALUMINUM HYDROXIDE :

as a phosphate binder in persons suffering from severe renal failure;

ANETHOL TRITHIONE :

for treatment of persons suffering from severe xerostomia;

BECAPLERMIN :

for treatment of grade I or II (Wagner) neuropathic (mal perforant) ulcers of a non-clinically infected diabetic foot, where the following criteria apply:

- acceptable vascularization, including a tibiohumeral index (THI) > 0.70 of the affected lower limb or presence of a palpable pulse;
- absence of underlying infection or of osteitis, as shown by x-rays or bone scanning;
- obligatory previous optimum wound care, specifically, wound care during an 8-week period including debridement, dressing that fosters a moist wound environment for scarring, and a system for relieving pressure on foot;
- patient's observance of wound care and of a system for relieving pressure on foot;

When submitting a renewal request, the physician must be able to demonstrate that the following adjuvant measures were used during the first becaplermin treatment:

- cleansing of ulcer with sterile saline only;
- weekly debridement (exerisis of callosity, of necrotic tissue or of foreign body);

- use and observance of a system for relieving pressure on foot (walking boot, cast, wheelchair);
- daily changes of dressing (becaplermin, non-adhering dressing and dry dressing);
- minimum 30 percent improvement in ulcer (proven by file photographs, copies of sketches and supporting measurements);
- absence of cellulitis and of osteomyelitis;

BETAHISTINE DIHYDROCHLORIDE

to reduce the severity of vertigo related to Ménière's disease or accompanying labyrinthitis;

BETAINE ANHYDROUS :

for treatment of hyperhomocysteinemia caused by:

- a deficiency in cystathionine β -synthase (CBS);
- a deficiency in 5, 10-methylenetetrahydrofolate reductase (MTHFR);
- a defect in cobalamin cofactor metabolism (cbl);

BISACODYL :

for treatment of constipation related to a medical condition;

BOTULINUM TOXIN TYPE A :

for treatment of cervical dystonia, blepharospasm, strabismus and other severe spasticity conditions;

BUTORPHANOL TARTRATE, nasal sol. :

for non-prophylactic treatment of migraine episodes or Horton's syndrome in persons for whom treatment with other opiate analgesics or other drug therapies is ineffective or poorly tolerated;

CABERGOLINE :

for treatment of persons for whom bromocriptine is ineffective, contraindicated or not tolerated;

**CALCIUM GLUCONATE/CALCIUM
GLUCOHEPTONATE :**

- ◆ as a calcium supplement for children suffering from bovine protein or lactose intolerance;

- ◆ as a calcium supplement for persons suffering from hypoparathyroidism, lactase deficiency or malabsorption and unable to take tablets;
- ◆ as a phosphate binder in persons suffering from severe renal failure and unable to take tablets;
- ◆ as a calcium supplement for persons suffering from osteoporosis and unable to take tablets;

CAPECITABINE:

- ◆ for treatment of advanced or metastatic breast cancer that has not responded to first-line chemotherapy;
- ◆ for treatment of advanced or metastatic colorectal cancer;

CAPSAICIN, top. cr.:

for treatment of pain caused by episodes of herpes zoster infection or related to peripheral neuropathies;

CARBOMER 940/SORBITOL:

for treatment of keratoconjunctivitis sicca or other severe conditions accompanied by markedly reduced tear production;

CARBOXYMETHYLCELLULOSE SODIUM:

for treatment of keratoconjunctivitis sicca or other severe conditions accompanied by markedly reduced tear production;

CARBOXYMETHYLCELLULOSE SODIUM/
PURITE:

for treatment of keratoconjunctivitis sicca or other severe conditions accompanied by markedly reduced tear production;

★CARVEDILOL:

for treatment of congestive heart failure;

★CIPROFLOXACIN, i.v. perf. sol.:

for treatment of infections where oral ciprofloxacin cannot be used;

CLINDAMYCIN PHOSPHATE, top. sol.:

for treatment of acne vulgaris in persons for whom topical erythromycin is ineffective or poorly tolerated;

CLINDAMYCIN PHOSPHATE, vag. cr.:

- ◆ for treatment of bacterial vaginosis during the first trimester of pregnancy;
- ◆ where intravaginal metronidazole is ineffective, contraindicated or poorly tolerated;

★CLOPIDOGREL:

- ◆ for prevention of ischemic vascular manifestations in persons for whom a platelet inhibitor is indicated but for whom acetylsalicylic acid is ineffective, contraindicated or poorly tolerated;
- ◆ for prevention of ischemic vascular manifestations, in association with acetylsalicylic acid, in persons for who have a coronary artery stent;

★CODEINE, syrup:

for treatment of pain in persons unable to take tablets;

DELTA-9-TETRAHYDROCANNABINOL:

- ◆ for treatment of severe vomiting and nausea associated with cancer chemotherapy;
- ◆ for treatment of severe vomiting and nausea not associated with chemotherapy and not responding to the conventional antiemetic therapy;

DICLOFENAC SODIUM, oph. sol.:

for treatment of ocular inflammation in persons for whom ophthalmic corticosteroids are not indicated;

DIPHENHYDRAMINE HYDROCHLORIDE:

for adjuvant treatment of certain psychiatric disorders and of Parkinson's disease;

DIPIVEFRIN HYDROCHLORIDE/LEVOBUNOLOL
HYDROCHLORIDE:

for treatment of glaucoma where treatment with a topical beta-blocker produces insufficient control of ocular tension;

DIPYRIDAMOLE/ACETYLSALICYLIC ACID:

for secondary prevention of strokes in persons who have already had a stroke or a transient ischemic attack;

DISODIUM ETIDRONATE:

- ◆ for treatment of Paget's disease;
- ◆ for maintenance treatment of hypercalcemia of malignant origin;

DOCUSATE CALCIUM:

for treatment of constipation related to a medical condition;

DOCUSATE SODIUM:

for treatment of constipation related to a medical condition;

★DOLASETRON MESYLATE:

- ◆ during the first day of a highly emetic chemotherapy or radiotherapy treatment;
- ◆ during chemotherapy or radiotherapy undergone by persons for whom the conventional antiemetic therapy is ineffective, contraindicated or poorly tolerated;

DONEPEZIL HYDROCHLORIDE:

for treatment of persons suffering from Alzheimer's disease at the mild to moderate stage.

Upon the initial request (beginning of treatment or in the case of persons who have been taking donepezil for less than 6 months):

- the person's MMSE score must be between 10 and 26;
and
- the physician must indicate the degree to which the person is affected (intact domain, mildly, moderately or severely affected) in the following five domains:
 - intellectual function, including memory;
 - mood;
 - behavior;
 - autonomy in activities of daily living (ADL) and in instrumental activities of daily living (IADL);
 - social interaction (including the ability to carry on a conversation).

The maximum duration of the initial authorization is 6 months.

Upon subsequent requests (maintenance treatment and in the case of persons who have been taking donepezil for more than 6 months), the physician must provide evidence of a beneficial effect:

- diminution of the person's MMSE score by 2 points or less;
and
- stabilization of or improvement in symptoms, in one or more of the following domains:
 - intellectual function, including memory;
 - mood;
 - behavior;
 - autonomy in activities of daily living (ADL) and in instrumental activities of daily living (IADL);
 - social interaction (including the ability to carry on a conversation).

The maximum duration of authorization is 6 months.

DORNASE ALFA:

- ◆ during initial treatment in persons over 5 years of age suffering from cystic fibrosis and whose forced vital capacity is more than 40 percent of the predicted value. The maximum duration of the initial authorization is 3 months;
- ◆ during maintenance treatment in persons for whom the physician provides evidence of a beneficial clinical effect. The maximum duration of the authorization is one year;

DRESSING – ACTIVATED CHARCOAL/SILVER:

for treatment of persons suffering from serious burns or severe cutaneous ulcers;

DRESSING – CARBOXYMETHYLCELLULOSE:

for treatment of persons suffering from serious burns or severe cutaneous ulcers;

DRESSING – HYDROCOLLOIDAL:

for treatment of persons suffering from serious burns or severe cutaneous ulcers;

DRESSING – HYDROGEL:

for treatment of persons suffering from serious burns or severe cutaneous ulcers;

DRESSING – SEMIPERMEABLE :

for treatment of persons suffering from serious burns or severe cutaneous ulcers ;

EPOETIN ALFA :

- ◆ for treatment of anemia related to severe chronic renal failure (during the dialysis stage or before the dialysis stage begins) ;
- ◆ for treatment of non-hemolytic anemia necessitating regular transfusions in persons having no iron, folic acid or vitamin B12 deficiency and where the anemia persists despite treatment of the underlying causes. In such cases, the maximum duration of the initial authorization is 3 months ;

ESTRADIOL-17β

- ◆ in persons unable to take estrogens orally because of intolerance or where medical factors favour the transdermal route ;

**ESTRADIOL-17β,
ESTRADIOL-17β/NORETHINDRONE ACETATE :**

- ◆ in persons unable to take estrogens or progestogens orally because of intolerance or where medical factors favour the transdermal route ;

ESTRADIOL-17β/NORETHINDRONE ACETATE :

- ◆ in persons unable to take estrogens or progestogens orally because of intolerance or where medical factors favour the transdermal route ;

EXEMESTANE :

for hormonal treatment of advanced breast cancer where anastrozole or letrozole is ineffective, contraindicated or not tolerated ;

★FILGRASTIM :

- ◆ for treatment of persons undergoing cycles of moderately or highly myelosuppressive chemotherapy (≥ 40 percent risk of febrile neutropenia) ;
- ◆ for treatment of persons at risk of developing severe neutropenia during chemotherapy ;
- ◆ in subsequent cycles of chemotherapy, for treatment of persons having suffered from severe neutropenia (neutrophil count below $0.5 \times 10^9/L$) during the first cycles of chemotherapy and for whom a reduction in the antineoplastic dose is inappropriate ;

◆ during chemotherapy undergone by children suffering from solid tumours ;

◆ for treatment of persons suffering from severe medullary aplasia (neutrophil count below $0.5 \times 10^9/L$) and awaiting curative treatment by means of a bone marrow transplant or with antithymocyte serum ;

◆ for treatment of persons suffering from congenital or hereditary neutropenia whose neutrophil count is below $0.5 \times 10^9/L$;

◆ for treatment of HIV-infected persons suffering from severe neutropenia (neutrophil count below $0.5 \times 10^9/L$) ;

◆ to stimulate bone marrow in the recipient in the case of an autograft ;

◆ as an adjunctive treatment for acute myeloid leukemia ;

FLUCONAZOLE, oral susp. :

◆ for treatment of esophageal candidiasis ;

◆ for treatment of oropharyngeal candidiasis or other mycoses in persons for whom the conventional therapy is ineffective or poorly tolerated and who are unable to take fluconazole tablets ;

★GANCICLOVIR, caps. :

◆ for maintenance treatment of cytomegalovirus (CMV) retinitis in immuno-compromised persons ;

◆ for prevention of cytomegalovirus infections in persons having undergone a transplant ;

GLATIRAMER ACETATE :

for treatment of persons suffering from cyclic remitting multiple sclerosis who are capable of walking, even if they require assistance, and who have had 2 or more episodes of the disease within the last 2 years.

The physician must provide, at the beginning of treatment and with each subsequent request, the following information : number of attacks per year, EDSS scale result, and adjuvant treatments.

The maximum duration of the initial authorization is 6 months. When submitting subsequent requests, the physician must provide evidence of a beneficial effect (absence of deterioration).

GLICLAZIDE :

- ◆ where another sulfonylurea is not tolerated or is ineffective;
- ◆ for treatment of non-insulindependent diabetic persons where disappearance of the first insulin secretory phase has been demonstrated;
- ◆ for treatment of non-insulindependent diabetic persons suffering from renal failure;

★GRANISETRON HYDROCHLORIDE :

- ◆ during the first day of a highly emetic chemotherapy or radiotherapy treatment;
- ◆ in children during emetic chemotherapy or radiotherapy;
- ◆ during chemotherapy or radiotherapy undergone by persons for whom the conventional antiemetic therapy is ineffective, contraindicated or poorly tolerated;

HYDROPHILIC POLYURETHANE, dres. :

for treatment of persons suffering from serious burns or severe cutaneous ulcers;

HYDROXYPROPYLMETHYLCELLULOSE :

for treatment of keratoconjunctivitis sicca or other severe conditions accompanied by markedly reduced tear production;

**HYDROXYPROPYLMETHYLCELLULOSE/
DEXTRAN 70 :**

for treatment of keratoconjunctivitis sicca or other severe conditions accompanied by markedly reduced tear production;

**HYDROXYPROPYLMETHYLCELLULOSE/
SODIUM PERBORATE :**

for treatment of keratoconjunctivitis sicca or other severe conditions accompanied by markedly reduced tear production;

INTERFERON BETA 1-A :

for treatment of persons suffering from cyclic remitting multiple sclerosis who are capable of walking, even if they require assistance, and who have had 2 or more episodes of the disease within the last 2 years.

The physician must provide, at the beginning of treatment and with each subsequent request, the following information: number of attacks per year, EDSS scale result, and adjuvant treatments.

The maximum duration of the initial authorization is 6 months. When submitting subsequent requests, the physician must provide evidence of a beneficial effect (absence of deterioration);

INTERFERON BETA 1-B :

- ◆ for treatment of persons suffering from cyclic remitting multiple sclerosis who are capable of walking, even if they require assistance, and who have had 2 or more episodes of the disease within the last 2 years.

The physician must provide, at the beginning of treatment and with each subsequent request, the following information: number of attacks per year, EDSS scale result, and adjuvant treatments.

The maximum duration of the initial authorization is 6 months. When submitting subsequent requests, the physician must provide evidence of a beneficial effect (absence of deterioration);

- ◆ for treatment of persons suffering from secondary progressive multiple sclerosis who have or have not had clinical episodes and whose EDSS scale result is less than 7.

The physician must provide, at the beginning of treatment and with each subsequent request, the following information: number of attacks per year, EDSS scale result, and adjuvant treatments.

The maximum duration of the initial authorization is 12 months. When submitting subsequent requests, the physician must provide evidence of a beneficial effect;

KETOROLAC TROMETHAMINE :

for treatment of ocular inflammation in persons for whom ophthalmic corticosteroids are not indicated;

LACTULOSE :

- ◆ for prevention and treatment of hepatic encephalopathy;
- ◆ for treatment of constipation related to a medical condition;

LEFLUNOMIDE :

for treatment of rheumatoid arthritis in persons for whom methotrexate is ineffective, contraindicated or not tolerated;

★LEVOFLOXACIN, i.v. perf. sol. :

for treatment of infections where oral levofloxacin cannot be used;

★LINEZOLIDE, tab. :

◆ for treatment of methicillin-resistant proven staphylococci infections;

◆ for treatment of vancomycin-resistant proven enterococci infections;

★LINEZOLIDE, i.v. perf. sol. :

◆ for treatment of methicillin-resistant proven staphylococci infections, where linezolid cannot be used orally;

◆ for treatment of vancomycin-resistant proven enterococci infections, where linezolid cannot be used orally;

MAGNESIUM GLUCOHEPTONATE :

for treatment of persons suffering from hypomagnesemia;

MAGNESIUM GLUCONATE :

for treatment of persons suffering from hypomagnesemia;

MAGNESIUM HYDROXIDE :

for treatment of constipation related to a medical condition;

MAGNESIUM HYDROXYDE/ALUMINUM HYDROXYDE :

as a phosphate binder in persons suffering from severe renal failure;

MEGESTROL ACETATE :

◆ for hormone therapy in the treatment of breast, endometrium and prostate cancer;

◆ for hormone replacement therapy where oral progestogens are ineffective or contraindicated;

METRONIDAZOLE, vag. gel :

◆ for treatment of bacterial vaginosis during the second and third trimesters of pregnancy;

◆ for treatment of bacterial vaginosis where metronidazole administered orally is not tolerated;

MIDAZOLAM :

◆ in palliative care, for persons having an obstruction of the upper respiratory tract or severe uncontrollable symptoms requiring titrated sedation;

◆ in palliative care, for non-prophylactic treatment of generalized convulsive seizures and of myoclonia where the intravenous route is not advisable;

MIDODRINE HYDROCHLORIDE :

for treatment of orthostatic hypotension;

MINERAL OIL :

for treatment of constipation related to a medical condition;

MODAFINIL :

for treatment of narcolepsy where dexamphetamine sulfate or methylphenidate are ineffective, contraindicated or not tolerated;

MULTIVITAMINS :

for persons suffering from cystic fibrosis;

NUTRITIVE FORMULAS – CASEIN-BASED (INFANTS AND CHILDREN) :

◆ for infants and children who are allergic to complete milk proteins.

In such cases, the maximum duration of the initial authorization is up to the age of 12 months. The results of an allergen skin test or of re-exposure to milk must be provided in order for utilization to continue;

◆ for infants and children suffering from galactosemia and requiring a lactose-free diet;

◆ for infants and children suffering from persistent diarrhea or other severe gastrointestinal problems. The results of re-exposure to milk must be provided in order for utilization to continue;

NUTRITIVE FORMULAS – FRACTIONATED COCONUT OIL:

for persons unable to effectively digest or absorb long-chain fatty foods;

NUTRITIVE FORMULAS – MONOMERIC:

- ◆ for enteral feeding;
- ◆ for total oral feeding of persons requiring nutritive formulas as their source of nutrition in presence of esophageal dysfunction or dysphagia, maldigestion or malabsorption;
- ◆ for children suffering from, malabsorption, malnutrition or growth failure related to a medical condition;
- ◆ for persons suffering from cystic fibrosis;

NUTRITIVE FORMULAS – MONOMERIC WITH IRON (INFANTS AND CHILDREN):

- ◆ for infants and children who are allergic to complete milk proteins, soy proteins or multiple dietary proteins and in whom the utilization of a casein hydrolysate formula has not succeeded in eliminating the symptoms.

The results of an allergen skin test or of re-exposure to a casein hydrolysate formula or milk must be provided in order for utilization to continue;

- ◆ for infants and children who are suffering from persistent diarrhea or other severe gastrointestinal problems and in whom the utilization of a casein hydrolysate formula has not succeeded in eliminating the symptoms.

The results of re-exposure to a casein hydrolysate formula or milk must be provided in order for utilization to continue;

NUTRITIVE FORMULAS – POLYMERIC LOW-RESIDUE:

- ◆ for enteral feeding;
- ◆ for total oral feeding of persons requiring nutritive formulas as their source of nutrition in presence of esophageal dysfunction or dysphagia, maldigestion or malabsorption;
- ◆ for children suffering from, malabsorption, malnutrition or growth failure related to a medical condition;

- ◆ for persons suffering from cystic fibrosis;

NUTRITIVE FORMULAS – POLYMERIC WITH RESIDUES:

- ◆ for enteral feeding;
- ◆ for total oral feeding of persons requiring nutritive formulas as their source of nutrition in presence of esophageal dysfunction or dysphagia, maldigestion or malabsorption;
- ◆ for children suffering from growth failure, malabsorption or malnutrition related to a medical condition;
- ◆ for persons suffering from cystic fibrosis;

NUTRITIVE FORMULAS – POLYMERIZED GLUCOSE:

to increase the caloric content of a person's diet and of other nutritive formulas;

NUTRITIVE FORMULAS – PROTEINS/ CARBOHYDRATES & LIPIDS (INFANTS AND CHILDREN):

for infants and children requiring a product low in mineral content;

NUTRITIVE FORMULAS – PROTEINS:

to increase the protein content of other nutritive formulas;

NUTRITIVE FORMULAS – SKIM MILK/ COCONUT OIL:

for persons unable to effectively digest or absorb long-chain fatty foods;

★ONDANSETRON:

- ◆ during the first day of a highly emetic chemotherapy or radiotherapy treatment;
- ◆ during emetic chemotherapy or radiotherapy undergone by children;
- ◆ during chemotherapy or radiotherapy undergone by persons for whom the conventional antiemetic treatment is ineffective, contraindicated or poorly tolerated;

PARAFFIN/MINERAL OIL:

for treatment of keratoconjunctivitis sicca or other severe conditions accompanied by markedly reduced tear production;

PENTOXIFYLLINE:

◆ for treatment of persons suffering from serious and chronic peripheral vascular ailments, specifically:

- in the case of venous insufficiency with cutaneous ulcer (or antecedents);
- in the case of arterial insufficiency with cutaneous ulcer (or antecedents), gangrene, antecedents of amputation or pain at rest;

PILOCARPINE HYDROCHLORIDE, tab.:

for treatment of severe xerostomia;

PIOGLITAZONE

◆ for treatment of type II diabetes, alone or in association with another hypoglycemic agent:

- where the association of metformin with a sulfonylurea does not produce optimum control of diabetes or cannot be used because of a contraindication or an intolerance to one of those drugs;
- where the association of metformin with insulin does not produce optimum control of diabetes or cannot be used because of a contraindication or an intolerance to metformin;

◆ for treatment of diabetic persons suffering from renal insufficiency;

POLYETHYLENE GLYCOL 400/DEXTRAN 70:

for treatment of keratoconjunctivitis sicca or other severe conditions accompanied by markedly reduced tear production;

POLYVINYL ALCOHOL:

for treatment of keratoconjunctivitis sicca or other severe conditions accompanied by markedly reduced tear production;

POLYVINYL ALCOHOL/POLYETHYLENE GLYCOL 6000:

for treatment of keratoconjunctivitis sicca or other severe conditions accompanied by markedly reduced tear production;

POLYVINYL ALCOHOL/POVIDONE:

for treatment of keratoconjunctivitis sicca or other severe conditions accompanied by markedly reduced tear production;

PSYLLIUM MUCILAGE:

◆ for treatment of constipation related to a medical condition;

◆ for treatment of chronic diarrhea;

REPAGLINIDE:

◆ where a sulfonylurea is contraindicated, not tolerated or ineffective;

◆ for treatment of non-insulindependent diabetic persons suffering from renal insufficiency;

RILUZOLE:

for treatment of amyotrophic lateral sclerosis in patients who have had symptoms of the disease for less than 5 years, whose vital capacity is more than 60% of the predicted value and who have not undergone a tracheotomy;

Upon the initial request (new case), the physician must indicate the date on which symptoms of the disease began and the patient's vital capacity measurement, and must confirm that the patient has not undergone a tracheotomy. The maximum duration of the initial authorization is 6 months.

Upon subsequent requests, and for patients already being treated, the physician must provide the patient's vital capacity measurement and confirm that the patient has not undergone a tracheotomy. The maximum duration of the authorization is 6 months. No renewal will be authorized in the presence of a tracheotomy.

RIVASTIGMINE:

for treatment of persons suffering from Alzheimer's disease at the mild to moderate stage.

Upon the initial request (beginning of treatment or in the case of persons who have been taking rivastigmine for less than 6 months):

- the person's MMSE score must be between 10 and 26;
- and
- the physician must indicate the degree to which the person is affected (intact domain, mildly, moderately or severely affected) in the following five domains:
 - intellectual function, including memory;
 - mood;
 - behavior;
 - autonomy in activities of daily living (ADL) and in instrumental activities of daily living (IADL);
 - social interaction (including the ability to carry on a conversation).

The maximum duration of the initial authorization is 6 months.

Upon subsequent requests (maintenance treatment and in the case of persons who have been taking rivastigmine for more than 6 months), the physician must provide evidence of a beneficial effect:

- diminution of the person's MMSE score by 2 points or less;
- and
- stabilization of or improvement in symptoms, in one or more of the following domains:
 - intellectual function, including memory;
 - mood;
 - behavior;
 - autonomy in activities of daily living (ADL) and in instrumental activities of daily living (IADL);
 - social interaction (including the ability to carry on a conversation).

The maximum duration of authorization is 6 months.

ROSIGLITAZONE:

- ◆ for treatment of type II diabetes, alone or in association with another hypoglycemic agent:
 - where the association of metformin with a sulfonylurea does not produce optimum control of diabetes or cannot be used because of a contraindication or an intolerance to one of those drugs;
 - where the association of metformin with insulin does not produce optimum control of diabetes or cannot be used because of a contraindication or an intolerance to metformin;

- ◆ for treatment of diabetic persons suffering from renal insufficiency;

SENNOSIDES A & B:

for treatment of constipation related to a medical condition;

SODIUM CHLORIDE, dres.:

for treatment of persons suffering from serious burns or severe cutaneous ulcers;

SODIUM CITRATE/SODIUM LAURYL SULFOACETATE:

for treatment of constipation related to a medical;

SODIUM DANAPAROID:

as an alternative to regular heparin or to low molecular weight heparins in patients who have or who have had thrombocytopenia induced by such heparins;

SODIUM PHOSPHATE MONOBASIC/SODIUM PHOSPHATE DIBASIC:

for treatment of constipation related to a medical condition;

SOMATREM:

- ◆ for treatment of children and adolescents suffering from delayed growth due to insufficient secretion of endogenous growth hormone, where they meet the following criteria:

- untermiated growth, a growth rate for their bone age below the 25th percentile (calculated over at least a 12-month period), and a somatropin serum or plasma level below 8 µg/mL in two pharmacological stimulation tests or between 8 and 10 µg/mL if the tests are repeated twice at a 6-month interval.

The 12-month observation period does not apply to children suffering from hypoglycemia secondary to growth hormone deficiency;

- excluded are children and adolescents suffering from achondroplasia or delayed growth of a genetic or familial type;
- excluded are children and adolescents whose bone age has reached 15 years for girls and 16 years for boys;

- excluded are children and adolescents whose growth rate during treatment falls below 2 cm per year when evaluated on two consecutive visits (at a 3-month interval);
- ◆ for treatment of children and adolescents suffering from delayed growth related to chronic renal failure until they undergo a kidney transplant, where they meet the following criteria:
 - untermiated growth, a glomerular filtration rate $\leq 1.25 \text{ mL/s./1.73m}^2$ ($\leq 75 \text{ mL/min./1.73m}^2$), and a HSDS \leq a standard deviation of -2 (HSDS = height compared to the average of normal values for their age and sex) or a $\Delta\text{HSDS} <$ a standard deviation of 0 where their height is below the 10th percentile (based on observation periods of at least 6 months for children over the age of one and at least 3 months for children under the age of one);
 - excluded are children and adolescents in whom, during treatment, no response (no increase in ΔHSDS in the first 12 months of treatment) is observed;
 - excluded are children and adolescents in whom, during treatment, an ossification of the conjugative cartilages is observed or who have reached their final predicted height;
 - excluded are children and adolescents whose growth rate, evaluated on two consecutive visits (at a 3-month interval), falls below 2 cm per year;
- ◆ for treatment of growth hormone deficiency in persons whose bone growth has terminated and who meet the following criteria:
 - somatropin serum or plasma level between 0 and 3 $\mu\text{g/mL}$ in a pharmacological test;

In persons who have a multiple hypophyseal hormone deficiency, and to confirm a deficiency acquired during childhood or adolescence, only one pharmacological stimulation test is necessary. In the case of an isolated growth hormone deficiency, two tests are required.

The insulin hypoglycemia test is recommended. If this test is contraindicated, the arginine test alone, or combined with the GHRH, may be substituted for it. Where the arginine test is combined with the GHRH, the value must be $\leq 9 \mu\text{g/L}$;

- in the case of adult onset, the deficiency must be secondary to hypophyseal or hypothalamic disease, surgery, radiation therapy or trauma;

- ◆ for treatment of Turner's syndrome:
 - the syndrome must have been demonstrated by a karyotype compatible with this diagnosis (complete absence or structural anomaly of one of the X chromosomes). This karyotype may be homogeneous or may be a mosaic;
 - excluded are girls whose bone age has reached 14 years;
 - excluded are girls whose growth rate, during treatment, falls below 2 cm per year when evaluated on two consecutive visits (at a 3-month interval);

SOMATROPIN

- ◆ for treatment of children and adolescents suffering from delayed growth due to insufficient secretion of endogenous growth hormone, where they meet the following criteria:
 - untermiated growth, a growth rate for their bone age below the 25th percentile (calculated over at least a 12-month period), and a somatropin serum or plasma level below 8 $\mu\text{g/mL}$ in two pharmacological stimulation tests or between 8 and 10 $\mu\text{g/mL}$ if the tests are repeated twice at a 6-month interval.

The 12-month observation period does not apply to children suffering from hypoglycemia secondary to growth hormone deficiency;

 - excluded are children and adolescents suffering from achondroplasia or delayed growth of a genetic or familial type;
 - excluded are children and adolescents whose bone age has reached 15 years for girls and 16 years for boys;
 - excluded are children and adolescents whose growth rate during treatment falls below 2 cm per year when evaluated on two consecutive visits (at a 3-month interval);

- ◆ for treatment of children and adolescents suffering from delayed growth related to chronic renal failure until they undergo a kidney transplant, where they meet the following criteria:
 - untermiated growth, a glomerular filtration rate $\leq 1.25 \text{ mL/s./1.73m}^2$ ($\leq 75 \text{ mL/min./1.73m}^2$), and a HSDS \leq a standard deviation of -2 (HSDS = height compared to the average of normal values for their age and sex) or a $\Delta\text{HSDS} <$ a standard deviation of 0

where their height is below the 10th percentile (based on observation periods of at least 6 months for children over the age of one and at least 3 months for children under the age of one);

- excluded are children and adolescents in whom, during treatment, no response (no increase in Δ HSDS in the first 12 months of treatment) is observed;
 - excluded are children and adolescents in whom, during treatment, an ossification of the conjugative cartilages is observed or who have reached their final predicted height;
 - excluded are children and adolescents whose growth rate, evaluated on two consecutive visits (at a 3-month interval), falls below 2 cm per year;
- ◆ for treatment of growth hormone deficiency in persons whose bone growth has terminated and who meet the following criteria:
- somatropin serum or plasma level between 0 and 3 μ g/mL in a pharmacological test;

In persons who have a multiple hypophyseal hormone deficiency, and to confirm a deficiency acquired during childhood or adolescence, only one pharmacological stimulation test is necessary. In the case of an isolated growth hormone deficiency, two tests are required.

The insulin hypoglycemia test is recommended. If this test is contraindicated, the arginine test alone, or combined with the GHRH, may be substituted for it. Where the arginine test is combined with the GHRH, the value must be $\leq 9 \mu$ g/L;

- in the case of adult onset, the deficiency must be secondary to hypophyseal or hypothalamic disease, surgery, radiation therapy or trauma;
- ◆ for treatment of Turner's syndrome:
- the syndrome must have been demonstrated by a karyotype compatible with this diagnosis (complete absence or structural anomaly of one of the X chromosomes). This karyotype may be homogeneous or may be a mosaic;
 - excluded are girls whose bone age has reached 14 years;

- excluded are girls whose growth rate, during treatment, falls below 2 cm per year when evaluated on two consecutive visits (at a 3-month interval);

TEMOZOLOMIDE :

for treatment of persons suffering from anaplastic astrocytoma or glioblastoma multiforme and in whom a recurrence or progression of the disease is observed after administration of a first-line treatment;

TIZANIDINE :

for treatment of spasticity where baclofen is ineffective, contraindicated or not tolerated;

TOBRAMYCIN SULFATE, inh. sol. :

for treatment of chronic *Pseudomonas aeruginosa* infections in persons suffering from cystic fibrosis, where deterioration of the person's clinical condition is observed despite the conventional treatment or where the person is allergic to preservatives;

TOCOPHERYL dl-ALFA ACETATE :

for prevention and treatment of neurological manifestations associated with malabsorption of vitamin E;

TOLTERODINE :

for treatment of vesical hyperactivity in persons for whom oxybutynin is poorly tolerated, contraindicated or ineffective;

TRETINOIN, top. cr., top. gel, top. sol. :

for treatment of acne or other skin diseases necessitating a keratolytic treatment;

VERTEPORFIN :

for treatment of age-related macular degeneration with neovascularization in persons where 50% or more of the macular area is affected;

WHITE PETROLEUM JELLY/MINERAL OIL :

for treatment of keratoconjunctivitis sicca or other severe conditions accompanied by markedly reduced tear production.
