This bill amends the Act respecting the Ministère des Ressources naturelles, de la Faune et des Parcs to create the position of chief forester, which is to be filled by government appointment. The chief forester is to hold the position of associate deputy minister for a five-year term in accordance with the Public Service Act.

The bill specifies that the chief forester supervises the operations for calculating annual allowable cuts, identifies the forest and ecological data required to make that calculation, and prepares the forest management manual. The chief forester also advises the Minister on the content of the plans required under the Forest Act, on the plans submitted to the Minister for approval, and on policy and planning in forest research and development.

The bill provides that the chief forester must draw up and send the Minister a five-year review of the state of the forests in the domain of the State and the results achieved with respect to sustainable forest development within the meaning of the Forest Act. The review is to be tabled in the National Assembly.

Under the bill, the chief forester may require a public body to provide the information and documents necessary for the exercise of the chief forester's functions of office.

The bill specifies that the Minister's mission includes facilitating the ecosystem-based, integrated and regionalized management of the activities carried on in the forests in the domain of the State.

Finally, the bill extends the special rules concerning advance harvesting applicable to the years 2005-2006, 2006-2007 and 2007-2008 enacted under the Act to amend the Forest Act and other legislative provisions applicable to forest management activities, passed on 22 March 2005, to the territory referred to in Chapter 3 of the Agreement Concerning a New Relationship Between le Gouvernement du Québec and the Crees of Québec.
