ARTICLE 17 PRINCIPLE OF TOTALIZATION

When persons have completed periods of insurance under the statutes of both Parties and are not eligible for benefits by virtue of the periods of insurance completed solely under the statutes of one Party, the competent

institution of that Party shall totalize, to the extent necessary for the entitlement to benefits under the statutes it applies, the periods of insurance completed under the statutes of each Party, provided that the overlapping periods are counted only once. As regards Greece, the periods of residence within the meaning of the Old Age Security Act shall also be totalized for entitlement to a benefit under the statutes of Greece.

ARTICLE 18
MINIMUM PERIOD TO BE TOTALIZED

Notwithstanding any other provision of the Agreement, if the total duration of the periods of insurance completed by a person under the statutes of a Party is less than one year and if, taking into account only those periods, a person is not entitled to a benefit under the statutes of that Party, the competent institution of that Party shall not be required to pay a benefit to that person.

ARTICLE 19
BENEFITS UNDER QUÉBEC STATUTES

1. If persons who have been subject to the statutes of both Parties meet the requirements for entitlement to benefits, for themselves or for dependents, survivors or successors, under Québec statutes, without having recourse to the totalization referred to in Article 17, the competent institution of Québec shall determine the amount of benefits in accordance with the provisions of the statutes it applies.

2. If the persons referred to in paragraph 1 do not meet the requirements for entitlement to benefits without totalization, the competent institution of Québec shall

(a) recognize one year of contribution when the competent institution of Greece certifies that a period of insurance of one year or at least 75 days or 3 months has been credited in a calendar year under the statutes of Greece, provided that the year is included in the contributory period as defined in Québec statutes; and

(b) totalize years recognized under subparagraph *a* with periods of insurance completed under Québec statutes, in accordance with Article 17.

3. If the totalization provided for in paragraph 2 entitles persons to benefits, the competent institution of Québec shall determine the amount payable by adding the amounts calculated in accordance with the following subparagraphs *a* and *b*:

(a) that part of the benefit which is related to earnings is calculated according to the provisions of the statutes of Québec;

(b) the amount of the flat-rate portion of the benefit payable under the provisions of this Agreement is determined by multiplying

the amount of the flat-rate benefit determined under the provisions of the Québec Pension Plan

by

the fraction which represents the ratio of the periods of contributions to the Québec Pension Plan in relation to the contributory period as defined in the statutes relating to that Plan.

ARTICLE 20
BENEFITS UNDER THE STATUTES OF GREECE

1. If persons who have been subject to the statutes of both Parties meet the requirements for entitlement to benefits, for themselves or for dependents, survivors or successors, under the statutes of Greece without having recourse to the totalization referred to in Article 17, the competent institution of Greece shall determine the amount of the benefits in accordance with the provisions of the statutes it applies.

2. If the persons referred to in paragraph 1 do not meet the requirements for entitlement to benefits without having recourse to the totalization, the competent institution of Greece shall

(a) recognize 300 days, 12 months or one year of insurance in accordance with the statutes of Greece for each year of insurance certified by the competent institution in Québec; and

(b) totalize periods of insurance in Québec recognized under subparagraph *a* with periods of insurance completed under the statutes of Greece, in accordance with Article 17.

3. If entitlement to a benefit is not acquired despite the application of paragraph 2, the competent institution of Greece shall

(a) recognize 25 days of insurance in accordance with the statutes of Greece for each month of residence within the meaning of the Old Age Security Act which applies in the territory of Québec, provided that the month does not overlap a period of insurance within the meaning of the statutes of Québec; and

(b) totalize the periods recognized under subparagraph *a* of paragraphs 2 and 3 with the periods of insurance completed under the statutes of Greece, in accordance with Article 17.

4. To determine the amount of a benefit acquired under totalization, the competent institution of Greece shall

(a) calculate the theoretical amount of the benefit that would be payable as if all the periods of insurance totalized under paragraph 2 and, where necessary, paragraph 3, had been completed under the statutes it applies;

(b) take into account the salaries (earnings), income, contributions or the average of the contributions paid during the periods of insurance completed under the statutes of Greece for the calculation of the theoretical amount;

(c) use the minimum benefit as theoretical amount if the theoretical amount determined is less than the minimum benefit;

(d) take the benefit amount as theoretical amount if the amount is not dependent on the period of insurance; and

(e) calculate the partial benefit payable by multiplying the theoretical amount of the benefit by the fraction representing the ratio between the periods of insurance completed under the statutes of Greece and the periods of insurance of both Parties totalized under Article 17.

5. Only the periods of insurance completed under the statutes of Greece shall be taken into account to determine the type of benefit and the competent institution.

6. If the granting of a benefit under a special plan requires the completion of periods of insurance in a specific profession or employment, the periods of insurance completed under the statutes of Québec in the same profession or employment shall be taken into account to determine eligibility to the benefit. If the total of the periods completed is not sufficient for entitlement to a benefit of the special plan, the periods shall be taken into account for the granting of a benefit under the general plan.

ARTICLE 21 PERIODS COMPLETED UNDER THE STATUTES OF A THIRD PARTY

If a person is not entitled to a benefit after the totalization under Article 19 or Article 20, the periods of insurance completed under the statutes of a third Party bound to each Party by a bilateral or multilateral agreement on social security containing provisions related to the totalization of periods of insurance are taken into account to establish entitlement to benefits, in accordance with the terms and conditions set out in this Title.

Before calculating the benefit under its own statutes, the institution shall process the claim taking into account the following provisions:

(b) if the granting of the benefits is subject to the condition that the disease be diagnosed within a fixed period after the cessation of the work likely to have caused the disease, the institution, in determining when the work was last performed, shall take into account, if necessary, similar work performed under the statutes of the other Party, as if it had been performed under the statutes it applies;

(c) if the granting of the benefits is subject to the condition that work likely to have caused the disease be performed for a certain period of time, the institution shall take into account, if necessary, periods during which such work was performed under the statutes of the other Party, as if it had been performed under the statutes it applies.

2. If the duration of the periods of work likely to have caused the occupational disease completed under the statutes of each Party is identical, the person, the person's dependents or successors must file a claim with the competent institution of the Party under whose statutes the person has performed the last period of work likely to have caused the occupational disease.
