## SCHEDULE

### ROADS UNDER THE MANAGEMENT OF THE MINISTER OF TRANSPORT

#### EXPLANATORY NOTE

#### A. CORRECTIONS TO DESCRIPTIONS, ADDITIONS AND WITHDRAWALS

The roads identified in the “Corrections to descriptions”, “Additions” and “Withdrawals” divisions appearing in the Schedule to this Order in Council are described under the following 5 headings for each municipality in which they are situated:

##### 1. Route class

The designation of the route classes is taken from the functional classification established by the Ministère des Transports.

##### 2. Section identification

Roads are identified by a sequence of figures composed of 7 different groups:

Road:	Group 1:	road number
	Group 2:	road segment number
	Group 3:	road section number

Sub-road:	Group 4:	the only figure other than zero that may appear in this group is 3, and it is used to identify one or more ramps
	Group 5:	this group of figures indicates the sequential number of an intersection within a road segment
	Group 6:	a letter identifying a ramp, if any
	Group 7:	a letter identifying the type of roadway (C: contiguous S: separate).

### 3. Name

For roads whose number is lower than 1,000, the road number is indicated instead of the road name. For roads whose number is 10,000 or higher, the road name is indicated instead of the road number.

Where there are one or more ramps along a road section, the total number of ramps for that section is also indicated; the combined length of all the ramps is indicated under “Length in km”.

### 4. Beginning of maintenance

The description of a physical landmark used to situate the beginning of a road section or the identification of a municipal boundary in the case of a road section located in more than one municipality.

### 5. Length in km

The length in kilometres is indicated for each road or part of a road. That length, which is determined by the Minister of Transport, corresponds to the actual distance that a vehicle would travel between 2 points, without taking into account the configuration of the road (number of lanes, extra width, etc.). The length is therefore the same whether the road is an autoroute or a feeder road.

### B. CHANGES IN WIDTH OF RIGHT-OF-WAY

The roads identified in the “Changes in width of right-of-way” division appearing in the Schedule to this Order in Council are described for each municipality in which they are situated under the following 6 headings:

**1. Section identification**

Roads are identified by a sequence of figures composed of 3 different groups:

Route:	Group 1:	road number
	Group 2:	road segment number
	Group 3:	road section number

**2. Name****3. Name of land surveyor****4. Minute number****5. Plan number****6. Length in km****C. GEOMETRIC REDEFINITIONS**

The roads identified in the “Geometric redefinitions” division appearing in the Schedule to this Order in Council are described using the 5 headings in Division “A” above, the plan number, the name of the land surveyor and the land surveyor’s minute number.

NOTE: The place names appearing in the Schedule do not necessarily comply with the standards of the Commission de toponymie du Québec.
