

Transport

Gouvernement du Québec

O.C. 502-2010, 9 June 2010

An Act respecting roads
(R.S.Q., c. V-9)

Roads under the management of the Minister of Transport

WHEAREAS, under the first paragraph of section 2 of the Act respecting roads (R.S.Q., c. V9), the Government must determine, by an order published in the *Gazette officielle du Québec*, the roads which are under the management of the Minister of Transport;

WHEAREAS, under the first paragraph of section 3 of the Act, the Government may, by an order published in the *Gazette officielle du Québec*, determine that a road which is under the management of the Minister is, from the date indicated in the order, to be managed by a municipality in accordance with Chapter I and Division I of Chapter IX of Title II of the Municipal Powers Act (R.S.Q., c. C-47.1);

WHEAREAS, under the second paragraph of section 3 of the Act, the Government may, by an order published in the *Gazette officielle du Québec*, determine that a road which is under the management of a municipality is, from the date indicated in the order, to pass under the management of the Minister;

WHEAREAS Order in Council 292-93 dated 3 March 1993 and its subsequent amendments determined, by municipality, the roads under the management of the Minister of Transport;

WHEAREAS it is expedient to again amend the Schedule to that Order in Council and its subsequent amendments in order to correct the description of certain roads and to list the roads that have been geometrically redefined and those whose right-of-way has undergone a change in width;

WHEAREAS it is expedient to again amend the Schedule to that Order in Council and its subsequent amendments in order to determine that certain roads under the management of the Minister are to pass under the management of the municipalities in which they are situated and that other roads under the management of municipalities are to pass under the management of the Minister;

IT IS ORDERED, therefore, on the recommendation of the Minister for Transport and the Minister of Transport:

THAT the Schedule to Order in Council 292-93 dated 3 March 1993 and its subsequent amendments concerning roads under the management of the Minister of Transport be amended, with respect to the municipalities indicated, by correcting descriptions, by adding and withdrawing certain roads and by listing the roads that have been geometrically redefined and those whose right-of-way has undergone a change in width in the Schedule to this Order in Council;

THAT this Order in Council take effect on the date of its publication in the *Gazette officielle du Québec*.

GÉRARD BIBEAU,
Clerk of the Conseil exécutif

SCHEDULE

ROADS UNDER THE MANAGEMENT OF THE MINISTER OF TRANSPORT

EXPLANATORY NOTE

A. CORRECTIONS TO DESCRIPTIONS, ADDITIONS AND WITHDRAWALS

The roads identified in the “Corrections to descriptions”, “Additions” and “Withdrawals” divisions appearing in the Schedule to this Order in Council are described under the following 5 headings for each municipality in which they are situated:

1. Route class

The designation of the route classes is taken from the functional classification established by the Ministère des Transports.

2. Section identification

Roads are identified by a sequence of figures composed of 7 different groups:

Road:	Group 1:	road number
	Group 2:	road segment number
	Group 3:	road section number

Sub-road: Group 4: the only figure other than zero that may appear in this group is 3, and it is used to identify one or more ramps

Group 5: this group of figures indicates the sequential number of an intersection within a road segment

Group 6: a letter identifying a ramp, if any

Group 7: a letter identifying the type of roadway (C: contiguous S: separate).

3. Name

For roads whose number is lower than 1,000, the road number is indicated instead of the road name. For roads whose number is 10,000 or higher, the road name is indicated instead of the road number.

Where there are one or more ramps along a road section, the total number of ramps for that section is also indicated; the combined length of all the ramps is indicated under “Length in km”.

4. Beginning of maintenance

The description of a physical landmark used to situate the beginning of a road section or the identification of a municipal boundary in the case of a road section located in more than one municipality.

5. Length in km

The length in kilometres is indicated for each road or part of a road. That length, which is determined by the Minister of Transport, corresponds to the actual distance that a vehicle would travel between 2 points, without taking into account the configuration of the road (number of lanes, extra width, etc.). The length is therefore the same whether the road is an autoroute or a feeder road.

B. CHANGES IN WIDTH OF RIGHT-OF-WAY

The roads identified in the “Changes in width of right-of-way” division appearing in the Schedule to this Order in Council are described for each municipality in which they are situated under the following 6 headings:

1. Section identification

Roads are identified by a sequence of figures composed of 3 different groups:

Route: Group 1: road number
Group 2: road segment number
Group 3: road section number

2. Name

3. Name of land surveyor

4. Minute number

5. Plan number

6. Length in km

C. GEOMETRIC REDEFINITIONS

The roads identified in the “Geometric redefinitions” division appearing in the Schedule to this Order in Council are described using the 5 headings in Division “A” above, the plan number, the name of the land surveyor and the land surveyor’s minute number.

NOTE: The place names appearing in the Schedule do not necessarily comply with the standards of the Commission de toponymie du Québec.
