

Draft Regulations

Draft Regulation

An Act respecting health services and social services (R.S.Q., c. S-4.2)

Classification of services offered by an intermediate resource and a family-type resource

Notice is hereby given, in accordance with sections 10 and 11 of the Regulations Act (R.S.Q., c. R-18.1), that the Regulation respecting the classification of services offered by an intermediate resource and a family-type resource, appearing below, may be made by the Minister of Health and Social Services on the expiry of 45 days following this publication.

The draft Regulation establishes the classification of services offered by an intermediate resource and a family-type resource, which is based on the level of support or assistance needed by users.

The draft Regulation has no major impact on the public and enterprises, including small and medium-sized businesses.

Further information may be obtained by contacting Pascale Lemay, 1075, chemin Sainte-Foy, 6^e étage, Québec (Québec) G1S 2M1; telephone: 418 266-8983; fax: 418 266-4572; email: pascale.lemay@msss.gouv.qc.ca

Any person wishing to comment on the draft Regulation is requested to submit written comments before the expiry of the 45-day period to the Minister of Health and Social Services, 1075, chemin Sainte-Foy, 15^e étage, Québec (Québec) G1S 2M1.

YVES BOLDUC,
*Minister of Health and
Social Services*

DOMINIQUE VIEN,
Minister for Social Services

Regulation respecting the classification of services offered by an intermediate resource and a family-type resource

An Act respecting health services and social services (R.S.Q., c. S-4.2, ss. 303 and 314)

1. An intermediate resource and a family-type resource must offer, to the users entrusted to them, their support and assistance services in accordance with this Regulation.

2. The services offered by an intermediate resource and a family-type resource are rated in 6 levels, which are based on the level of support or assistance needed by users.

A single resource may offer services from several levels.

3. The services of all levels include the common support or assistance services provided for in Part 1 of the Form for the determination and rating of support and assistance services appearing in the Schedule, which vary according to the type of organization set up by the resource to take users in charge.

Specific support and assistance services are added to the common services provided for in the first paragraph.

4. The specific support and assistance services referred to in the second paragraph of section 3 are determined by completing Part 2 of the form. For that purpose, the institution identifies, under each descriptor in that Part, the specific support and assistance services expected from the resource.

In cooperation with the resource and if necessary, the institution then specifies, in the manner shown in the form, the specific support or assistance services identified pursuant to the first paragraph.

5. Once Part 2 of the form is completed, the level of services required by the user is determined by adding the highest ratings obtained under each descriptor. Depending on the result obtained, the services belong to one of the following level of services:

- (1) level 1 services: 34 points or less;
- (2) level 2 services: between 35 and 69 points;
- (3) level 3 services: between 70 and 104 points;
- (4) level 4 services: between 105 and 139 points;
- (5) level 5 services: between 140 and 174 points;
- (6) level 6 services: 175 points or more.

6. The form must be completed and signed by the person designated by the institution and then remitted to the resource not later than 1 month after the new user's arrival in the resource or, in the case of a child taken in charge by an institution that operates a child and youth protection centre, not later than 2 months after the child's arrival.

The form must be reviewed by the institution at least once a year; in the case of a user of 2 years of age or less, that review must be done every 6 months. However, the institution must, as soon as possible, make the correction required in the form following any change in the condition of a user requiring a modification in the services expected from the resource or in the clarifications concerning those services.

7. After having obtained the consent of the user or the person that may consent on the user's behalf, the institution must send to the resource, as soon as possible but not later than 72 hours after the new user's arrival, a summary of the information necessary for taking the user in charge. That summary must at least include the information provided for in Part 3 of the form.

However, any information essential to the immediate maintenance of the user's integrity must be communicated by the institution to the resource before or at the same time as the user's arrival within the resource.

8. This Regulation replaces the Regulation respecting the classification of services offered by family-type resources and the rates of compensation applicable to each type of service (R.R.Q., c. S-4.2, r. 2) and the Regulation respecting the classification of the services provided by intermediate resources (R.R.Q., c. S-4.2, r. 3).

However, despite the first paragraph, the provisions of the Regulations referred to therein remain in force to the extent that they are necessary for the application of any provision of Division VII of the Regulation respecting the application of the Act respecting health services and social services for Cree Native persons (R.R.Q., c. S-5, r. 1), the Regulation respecting the contribution of users taken in charge by intermediate resources (R.R.Q., c. S-4.2, r. 7), or the Regulation respecting financial assistance to facilitate tutorship to a child (R.R.Q., c. P-34.1, r. 5).

9. The provisions of this Regulation come into force on 1 January 2012.

However, they take effect

(1) in respect of an intermediate resource, on the day of coming into force of one of the following texts, depending on the text binding the resource:

(a) an agreement signed pursuant to section 32 of the Act respecting the representation of family-type resources and certain intermediate resources and the negotiation process for their group agreements (R.S.Q., c. R-24.0.2);

(b) an agreement entered into pursuant to section 303.1 of the Act respecting health services and social services;

(c) a decision of the Minister made with the authorization of the Conseil du trésor pursuant to subparagraph 2 of the third paragraph of section 303 of the Act respecting health services and social services or the third paragraph of section 303.1 of that Act;

(2) in respect of a family-type resource, the day of coming into force of one of the following texts, depending on the text binding the resource:

(a) an agreement signed pursuant to section 32 of the Act respecting the representation of family-type resources and certain intermediate resources and the negotiation process for their group agreements;

(b) a decision of the Minister made with the authorization of the Conseil du trésor pursuant to subparagraph 2 of the third paragraph of section 303 and section 314 of the Act respecting health services and social services.

Schedule 1**Form for the determination and classification of support and assistance services****Part 1** Support and assistance services common to all levels**Division 1**

Support or assistance services common to all levels of services provided by a family-type resource or an intermediate resource according to a "foster home", "group residence" type of organization or another type of organization requiring similar services are the following:

Maintaining the life environment	The premises occupied by the resource, inside and outside, are well maintained. The resource complies with the recognized hygiene and sanitation standards. Furnishings and accessories necessary for daily living are sufficient and in good condition. The repairs required are carried out within a reasonable time.
Ensuring comfort and safety	Temperature, humidity and lighting conditions are adequate. Ventilation is satisfactory. The resource complies with the legislative and regulatory provisions and with the municipal standards that apply regarding safety. The actions to take in an emergency are planned. Space is designed in a functional and safe manner for the needs of users and according to their condition. Hazardous or toxic products and objects are stored in safe places provided for that purpose. The resource takes the necessary measures to avoid accidents or incidents and, where applicable, reports them according to the procedure provided for in section 233.1 of the Act.
Preparing and ensuring meal service	The resource prepares meals and snacks in accordance with Canada's Food Guide and the user's needs thereby promoting healthy eating. Meals are composed of a variety of food that generally has good nutrition value. The resource respects the user's rhythm, taste and food preferences. The resource complies with the current hygiene and sanitation standards.
Looking after clothing	The resource ensures that the user's clothing is sufficient to allow the user to change clothes regularly and wear clothes that are adequate for and appropriate to seasons and circumstances. The resource takes the necessary means so that the user's clothes are clean and in good condition.

Ensuring that the user's hygiene is adequate	The resource sees to it on a daily basis that the user is clean and that the user's clothes are changed regularly.
Making purchases necessary for users	For the user who so requires, the resource makes purchases necessary for the user, in particular regarding personal care, medications, clothes, leisure or other special needs. The resource, so far as possible, takes into account the user's tastes, habits, skills, limitations and characteristics in choosing the good or service to be provided to the user. The resource looks for the best quality/price ratio and respects the available financial resources. The resource obtains the required authorizations, where applicable, and keeps vouchers from purchases made for the user.
Ensuring the management of the users' assets and making an inventory of their property	Where the user so requires, the resource ensures the management of the user's allowance for personal expenses or other special allowances, or of the user's minor expenses. The resource involves, so far as possible, the user in the management of the user's expenses. The resource complies with the principles of sound financial management. The amounts are judiciously spent for their intended purpose. The resource must account for its management to the institution, on request. The resource complies with the institution's policy on that matter and the applicable acts. The resource, in collaboration with the institution's caseworker, completes the inventory of the user's clothes, personal effects and other significant objects, when required by the institution.
Supporting and assisting the user in daily activities	The resource supports and assists the user in daily activities. The resource exercises an appropriate supervision of the user, inside and outside of the premises occupied by the resource. The resource meets the user's stimulation needs and helps the user in learning activities. The resource promotes the user's well-being and the development or continued use of acquired abilities. The resource promotes communication and listens to the user. The requests addressed to the user are adapted to the user's abilities.

Establishing a living environment	The resource clearly and simply informs the user of the operating rules. The resource establishes a balanced and adapted living routine. The resource transmits positive values. The resource acts with consistency and coherence. The resource encourages the user to develop or maintain adequate and safe behaviour. The resource ensures that each user's limits and privacy needs are respected. In accordance with the applicable acts, the resource respects and ensures that the user's right to safeguard his or her dignity and respect for his or her privacy and the confidentiality of information concerning the user are respected.
Promoting the user's access to activities organized by the resource or in the community	The resource is able to organize and conduct daily life activities that meet the user's needs and interests. The resource participates in the user's maintenance or integration in the community. The resource promotes the user's access to leisure activities and community life.
Ensuring an adequate follow-up of all the necessary health services and social services	The resource ensures an adequate follow-up of all the health services and social services required by the user's condition. The resource pays attention to the user's feelings of discomfort and responds to them adequately, according to the circumstances. The resource sees to it that the appropriate treatment is provided to the user and that the user is accompanied, if necessary. The resource ensures that the technical equipment and aid used for health services and social services are clean and in good working order.
Ensuring protection from abuse	The resource implements mechanisms of protection from any form of abuse (physical, sexual, power, financial, psychological, etc.) in respect of the user.
Ensuring quality time	The resource ensures the presence at all times of a person in charge within the life environment or, according to the user's degree of autonomy, that such a person may be reached if necessary. That person must have the necessary attitudes and skills to ensure the provision of support or assistance services required by the users and ensure the stability and continuity of services.

Promoting integration into the life and social environment	The resource promotes the user's integration into the user's life environment. The resource considers and treats the user with fairness. The resource affords the user living conditions as close to a natural environment as possible. The resource allows the user to get involved in the user's life environment. The resource also encourages the user, where possible, to have an active and adequate social life.
Collaborating with various partners involved with the user	The resource inquires about the user's participation, behaviour and needs in the user's integration activities (school-work-other) with persons in charge of those activities and ensures the necessary follow-up. The resource sends relevant observations to the various partners involved with the user. When required to do so, the resource participates in discussions.
Collaborating with the institution	The resource collaborates with the institution to improve the user's situation and contribute to reduce or resolve the user's problems. Where necessary, the resource participates in clarifying the services required by the user. The resource shares with the institution any relevant information regarding the user, in particular information that is likely to cause changes in the assessment of the user's condition and in the services to be provided to the user. The resource participates in the process to improve the quality of services provided by the institution.
Promoting the user's family ties, if any, and persons who are important to the user	The resource shows respect towards the user's family members and persons who are important to the user. The resource respects the user in his or her feelings towards those persons. When indicated to do so, the resource promotes the user's contact with those persons.

Division 2

Support or assistance services common to all levels of services provided by an intermediate resource of a "supervised apartment", "rooming house" type of organization or any other type of organization requiring similar services are the following:

Providing a safe, clean and functional apartment or room	The resource provides a safe, clean and functional apartment or room and takes the necessary means so that those conditions are maintained.
Ensuring the performance of the user's domestic life activities	The resource ensures that the user's household tasks, such as maintaining the home, preparing meals, doing laundry, managing his or her budget or running errands, are performed, and ensures that the user adequately uses the means of transportation and communication.
Ensuring the performance of the user's daily life activities	The resource ensures that the user's daily life activities, such as eating, washing, self-care or dressing properly are performed.
Ensuring the user's healthy lifestyle	The resource ensures that the user has a healthy lifestyle in particular regarding food, sleep and the user's activities.
Ensuring the management of the users' assets and making an inventory of their property	Where the user so requires, the resource ensures the management of the user's allowance for personal expenses or other special allowances, or of the user's minor expenses. The resource involves, so far as possible, the user in the management of the user's expenses. The resource complies with the principles of sound financial management. The amounts are judiciously spent for their intended purpose. The resource must account for its management to the institution, on request. The resource complies with the institution's policy on that matter and the applicable acts. The resource, in collaboration with the institution's caseworker, completes the inventory of the user's clothes, personal effects and other significant objects, when required by the institution.
Ensuring an adequate follow-up of all the necessary health services and social services	The resource ensures an adequate follow-up of all the health services and social services required by the user's condition. The resource pays attention to the user's feelings of discomfort and responds to them adequately, according to the circumstances. The resource sees to it that the appropriate treatment is provided to the user and that the user is accompanied, if necessary. The resource ensures that the technical equipment and aid used for health services and social services are clean and in good working order.
Ensuring protection from abuse	The resource implements mechanisms of protection from any form of abuse (physical, sexual, power, financial, psychological, etc.) in respect of the user.

Ensuring that a person in charge is available at all times

The resource ensures that the user may, if necessary, reach a person in charge. That person must have the necessary attitudes and skills to ensure the provision of support or assistance services required by the users and ensure the stability and continuity of services.

Promoting integration into the life and social environment

The resource promotes the user's integration into the user's life environment. The resource considers and treats the user with fairness. The resource affords the user living conditions as close to a natural environment as possible. The resource allows the user to get involved in the user's life environment. The resource also encourages the user, where possible, to have an active and adequate social life.

Collaborating with various partners involved with the user

The resource inquires about the user's participation, behaviour and needs in the user's integration activities (school-work-other) with persons in charge of those activities and ensures the necessary follow-up. The resource sends relevant observations to the various partners involved with the user. When required to do so, the resource participates in discussions.

Collaborating with the institution

The resource collaborates with the institution to improve the user's situation and contribute to reduce or resolve the user's problems. Where necessary, the resource participates in clarifying the services required by the user. The resource shares with the institution any relevant information regarding the user, in particular information that is likely to cause changes in the assessment of the user's condition and in the services to be provided to the user. The resource participates in the process to improve the quality of services provided by the institution.

Promoting the user's family ties, if any, and persons who are important to the user

The resource shows respect towards the user's family members and persons who are important to the user. The resource respects the user in his or her feelings towards those persons. When indicated to do so, the resource promotes the user's contact with those persons.

Part 2 Specific support or assistance services**Division 1** General**Identification of user**

Surname and given name of user: _____ User No. _____
Date of birth: _____ Sex: F M
Program service: _____

Identification of resource

Name of resource: _____ Resource No.: _____
Name of person in charge: _____
Address: _____
Telephone No.: _____

Identification of institution

Provider in charge: _____
Institution: _____
Telephone No.: _____
Signature: _____

Identification of common support or assistance services

FTR or IR foster home or group residence, or other:
IR supervised apartment or rooming house, or other:

Classification

Total of higher ratings: _____
Level of services: _____
Date of rating: _____

Date and signature

Date the form is given to the resource: _____
Signature of person designated by institution: _____

Division 2 Identification and clarification of specific support or assistance services

Under each of the proposed descriptors, the institution checks the specific support or assistance services expected from the resource to attain the objective identified for the user, taking into account the user's condition.

The descriptor indicates the general nature of the specific support or assistance service (for instance: feeding) and the objective pursued for the user through the performance of the specific support or assistance services required from the resource (for instance: Eat properly).

In cooperation with the resource, and if necessary, the institution specifies the service or services identified in relation to the user's interest, the user's state of health and well-being, procedures, protocols and other standards of care applicable in the institution. The institution gives the resource, if need be, the relevant extracts from the identified procedures, protocols and other standards of care.

The institution identifies the highest rating obtained under each descriptor and then adds them up. The institution is to add all the highest ratings under each descriptor. The total score obtained enables the rating of the services offered by the resource to the user concerned, according to the levels provided for in section 5 of the Regulation.

Feeding

Eat properly without risk of choking and risk to the user's health.

N.B. The descriptor includes meals and snacks.
