

4. Liaison teams

The post-acute transitional period from the hospital centre to the living environment or a transitional environment constitutes a vulnerability period with different risks for the persons and their close relations. The professionals of the primary care liaison service are nurses and social workers who work in partnership with intervening parties of the interdisciplinary team of the CHU de Québec–Université Laval. They are key actors in planning the departure and ensuring a harmonious and safe transition by guaranteeing an optimal continuity of care and services. The liaison activities range from identifying clients at risk of an unsafe departure from the hospital centre to appropriate guidance.

The transfer concerns only primary care liaison teams that cover emergency rooms and patient care units.

Considering that the employees belonging to the liaison teams are not grouped into separate budgetary services, the list of the employees to be transferred will be provided to the Centre intégré universitaire de santé et de services sociaux de la Capitale-Nationale not later than the date on which the activities are transferred.
