INSTRUCTIONS

(1) *A reporting issuer may disclose contingent resources data or prospective resources data in a statement of the reserves data and other information filed under item 1 of section 2.1 of the Regulation, however, that data must only be disclosed as an appendix to that statement.*

(2) *The following cautionary statement must be included in bold font and appear proximate to the risked net present value of future net revenue associated with contingent resources or prospective resources:*

An estimate of risked net present value of future net revenue of [contingent resources][and][prospective resources] is preliminary in nature and is provided to assist the reader in reaching an opinion on the merit and likelihood of the company proceeding with the required investment. It includes [contingent resources][and][prospective resources] that are considered too uncertain with respect to the [chance of development][and][chance of discovery] to be classified as reserves. There is uncertainty that the risked net present value of future net revenue will be realized.

(3) *A reporting issuer may not rely on subsection 5.9(3) of the Regulation for disclosure required to be included in this Part.*

(4) *If a reporting issuer's disclosure of contingent resources or prospective resources would, to a reasonable person, be misleading if not accompanied by an explanation of the reporting issuer's ownership of or control over those resources, explain the nature of the reporting issuer's ownership of or control over all contingent resources and prospective resources disclosed in the statement filed or to be filed under item 1 of section 2.1 of the Regulation.*

(5) *A reporting issuer's disclosure respecting the value of prospective resources or contingent resources that are not in the development pending project maturity sub-class must be risked and must include an explanation of the factors considered respecting the chance of commerciality, which includes both chance of discovery and chance of development in the case of prospective resources and chance of development in the case of contingent resources.*

GUIDANCE

(1) *A reporting issuer is subject to sections 5.9 and 5.17 of the Regulation when providing disclosure of contingent resources data or prospective resources data in this Form.*

(2) *A reporting issuer providing disclosure of contingent resources data or prospective resources data in this Form must have an evaluation process for contingent resources or prospective resources that*

(a) *is at least as rigorous as would be the case for reserves data;*
and

(b) *is recognized as well-established in the oil and gas industry.*

(3) *An evaluation process described in subsection (2) is not needed if a reasonable qualified evaluator or auditor would conclude that it is not necessary in the circumstances.*

(4) *All public disclosure by reporting issuers is subject to the general prohibition against misleading statements. The disclosure of development on-hold, development unclarified or development not viable contingent resources, or prospective resources, in the statement of reserves data and other oil and gas information might be misleading where there is a significant degree of uncertainty and risk associated with those estimates.*

“Item 7.1 Contingent Resources Data

1. If a reporting issuer discloses contingent resources in the statement filed under item 1 of section 2.1 of the Regulation, the reporting issuer must disclose all of the following:

(a) the risked 2C contingent resources volumes, gross and net, for each product type, and classified in each applicable project maturity sub-class;

(b) if contingent resources in the development pending project maturity sub-class are disclosed, the risked net present value of future net revenue of the 2C contingent resources in the development pending project maturity sub-class, calculated using forecast prices and costs for each product type, before deducting future income taxes and using discount rates of 0%, 5%, 10%, 15% and 20%.

2. Disclose the numeric value of the chance of development risk and describe the method of all of the following:

(a) quantifying the chance of development risk;

(b) estimating the contingent resources adjusted for chance of development risk and the associated risked net present value of future net revenue.

Such contractually committed prices must be used, instead of benchmark reference prices for the purpose of estimating contingent resources data and prospective resources data, unless a reasonable investor would find the use those contractually committed prices misleading.*

“Item 7.4 Supplemental Contingent Resources Data

The reporting issuer may supplement its disclosure of contingent resources data under Item 7.1 by also disclosing estimates of contingent resources together with estimates of associated risked net present value of future net revenue, determined using constant prices and costs rather than forecast prices and costs for each applicable product type.”.
