Draft Regulation

An Act respecting the Société des alcools du Québec (chapter S-13)

Use of raw materials by holders of a small-scale wine producer's permit — Amendment

Notice is hereby given, in accordance with sections 10 and 11 of the Regulations Act (chapter R-18.1), that the Regulation to amend the Regulation respecting use of raw materials by holders of a small-scale wine producer's permit, appearing below, may be made by the Government on the expiry of 45 days following this publication.

The draft Regulation amends the Regulation respecting use of raw materials by holders of a small-scale wine producer's permit (chapter S-13, r. 6.2) to clarify and modify its scope. The draft Regulation is to ensure that small-scale production permit holders must use, in making their products, at least 50% of their own fresh grapes or its equivalent in juice from their total production. They may also use no more than 50% of fresh grapes or its equivalent in juice produced by another Québec farm producer, whether or not the farm producer is a small-scale production permit holder.

Permit holders are authorized to use, in making their products, raw materials from outside Québec. The composition of each product must then comply with the proportions set by the Regulation, that is: at least 50% of their own fresh grapes or its equivalent in juice; no more than 15% of fresh grapes or its equivalent in juice or grape must concentrate that may come from outside Québec; the remainder may consist of fresh grapes or its equivalent in juice produced by another Québec farm producer, whether or not the farm producer is a small-scale production permit holder. However, from the vintage year 2022, small-scale production permit holders must make their products from grapes that are 100% Québec grown, including at least 50% of their own fresh grapes or its equivalent in juice.

Study of the matter has shown no impact on the public and a positive impact on small and medium-sized businesses.
